CENTUM VP Overview
Web-based Training

Course Description

This web-based training course is designed to familiarize the student with the features and operation of the CENTUM VP system; it provides self paced preliminary training.

Please heed the precaution that the WBT does not prepare you for hands-on operation of a running plant. The WBT prepares you for classroom and "On the Job" training to master the operations of a running plant.

Duration
o   2 hours course; 2 week access to complete.

Objectives/Outcomes

Upon completing the course, the learner will be able to exhibit the ability to:

o   Identify and define the function of each system component
o   Know how to acknowledge and respond to process and system alarm messages
o   Identify and interact with all the standard display panels

Intended Audience
o   All persons tasked with process operations using the CENTUM VP system.

Course Prerequisites
o   None

Technical Requirements
o   Ability to operate in the Microsoft windows environment
