

General Specifications

Model VP6CPJT
Project ID License

GS 33J01A50-01EN

[Release 6]

■ GENERAL

Project ID License is an essential license that is assigned to a VP project of CENTUM VP system.

■ FUNCTION SPECIFICATIONS

● Project ID Number

Project ID number that starts with “VP” and follows with a six-digit numeral, is a unique number per VP project. Each software license is issued and managed based on this project ID number.

● Project Scale

The project ID license is classified into two types: for a small/middle project and for a large project. Each software license must be the same project scale with of the project ID license.

● Vnet/IP Ring Topology License (Option)

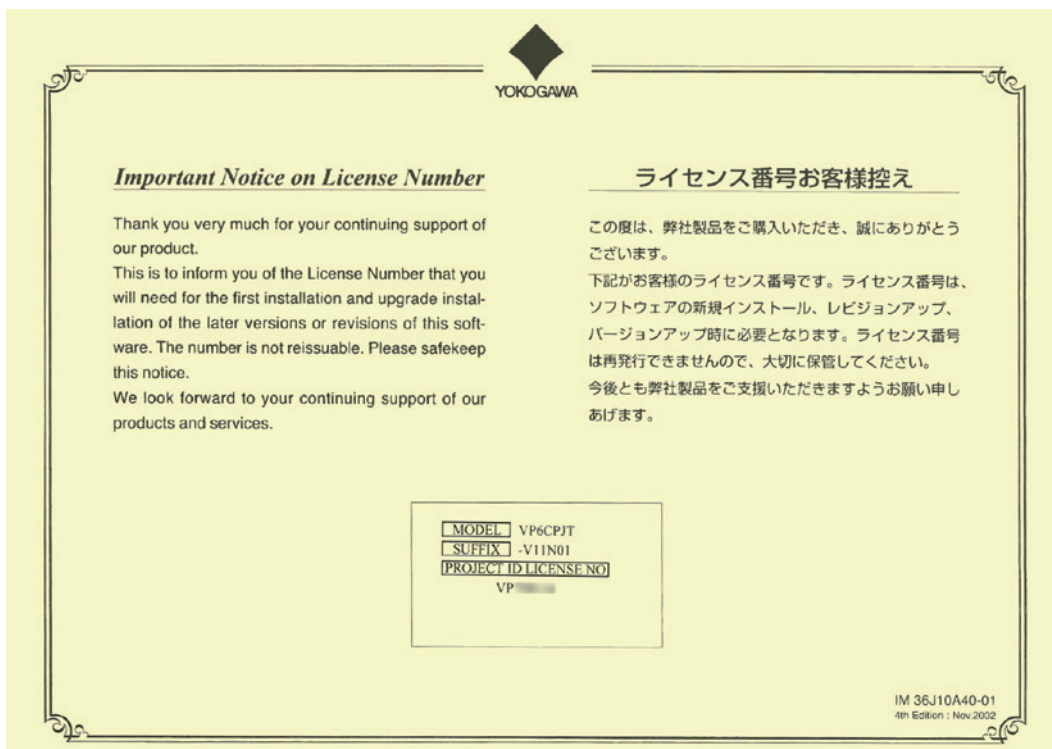

Vnet/IP Ring Topology License is required to apply the ring topology on Vnet/IP that is a control network of CENTUM VP. It is specified by an option code of the project ID license.

● Supplied Medium

A license sheet on which the project ID number is described is issued.

This number is required when ordering, version-upgrading, and revision-upgrading of CENTUM VP.

The license sheet should be treated carefully because it cannot be issued again.
