Company Outline

Bushu Pharmaceuticals, Ltd. began operations in January 1999 as a pioneer in the pharmaceutical CMO business.

Our mission is "Supporting the global healthcare industry to create a healthier tomorrow". We are providing a broad range of service menus tailored to the needs of our customers, with the aim of becoming a "trusted, vibrant, and attractive pharmaceutical contract manufacturing company for our customers and people both domestic as well as worldwide."

Introduction Background and History

In addition to the increase in the number of items compared to several years ago, the demand for data integrity in test results has increased, and the amount of test records has increased.

In addition, because the results from analytical instruments were entered into Excel as well, double inputting occurred, resulting in an increase in the amount of work and human error when recording.

There was a lot of time spent by the tester on test recording, with the tester usually pressed for test time.

Therefore, we wanted to improve the accuracy of testing by increasing the time required for the actual testing.

In addition, LIMS was considered to be required to provide complete test records quickly at the time of inspection by the authorities and outsourcer.

Future prospects
