Easy addition of temporally monitoring into regular monitoring
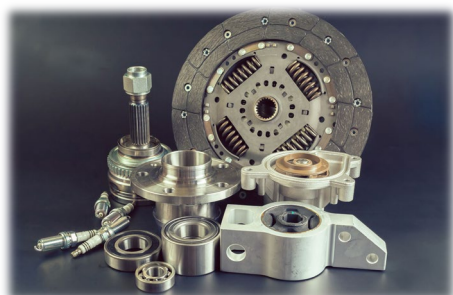

Production and the plan / improvement department, Maintenance for facilities at site

Automobile part manufacturer

Improvement and integration with VZ20X

- Regular monitoring by human -> Regular monitoring with VZ20X combing with motor monitoring (Human cost reduction)
- Temporary motor monitoring -> Portable monitoring with VZ20X (Compact, easy wiring at reasonable cost)

Item	Descriptions
Problems	• Automate regular humidity and temperature monitoring at sites done by human • Need to monitor vibration of some motors permanently • In addition, need to add some motors to be monitored unregularly (Require portable monitoring) • Measured data should be recorded without using PC
Solutions	• Built complete system with VZ20X, GA10 and GM10 • Install VZ20X unit as temporary monitoring unit then connect it to GM10
Features	• Compact and easy connection between GM10 to monitor the data with ethernet cable • Realize total system at reasonable cost

Fixed for regular monitoring

VZ20X

Install for temporary monitoring

Integrate Vibration and temp. data with GM10

Install for temporary monitoring

GA10 Data Logging Software
