Add measurement points in small space far from control panel

Monitoring for equipment

Automobile

Customer benefit
Located in a small footprint within the equipment, the Data Logging Software GA10 makes it easy to monitor and record DATA.

Item	Descriptions
Problems	• There are some other signals from torque meter or several sensors at an equipment to be connected from GA10 to monitor them but there is not enough space to add GM10 modules in the control panel • Moreover, the control panel is far from the equipment
Solution	• Put VZ20X close to the sensor then connect with GA10 via ethernet
Features	• VZ20X is compact and installable any equipment • Easy data monitoring with Ethernet cable and GA10

GA10
Data Logging Software

Issue 1 : No space to install another GM10
Issue 2 : Hard to wire between sensor to control panel

Long-distance

GA10
Data Logging Software

Solution : Install VZ20X close to sensor then connect with monitoring system via ethernet
