

Highly noise-resistant measurement in clean room

Test for clean room product

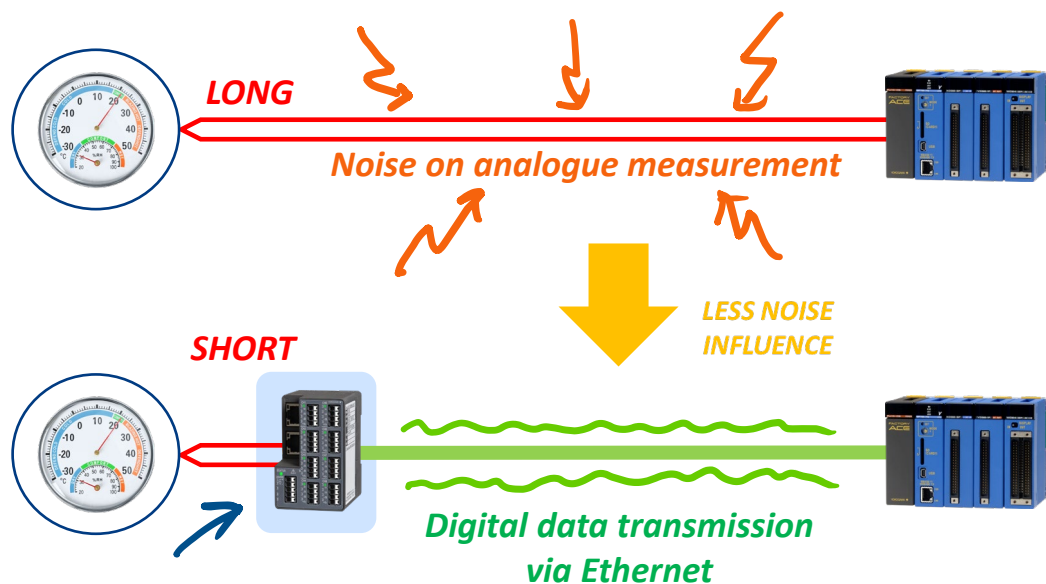

Clean room vendor

Improvement with VZ20X

- Reduce the influence of noise by shortening the wiring length between sensor and measurement device
- High noise-resistant of VZ20X and digital measurement data transmission via ethernet also reduce the risk

Item	Descriptions
Problem	<ul style="list-style-type: none"> • Improve noise influence on measurement
Solutions	<ul style="list-style-type: none"> • Put VZ20X close to sensor to reduce the wiring length between them • Reduce the noise influence with Digital data transmission by VZ20X modbus TCP
Features	<ul style="list-style-type: none"> • Smart network wiring • Realize highly noise-resistant measurement data monitoring

Highly noise-resistant
