

Simplified equipment status DATA collection

Equipment DATA, such as dryer temperature and vibration, collected with VZ20X & GA10

Modern beer factory

Benefit

- Space saving and easy installation
- Easy gathering with GA10

Item	Descriptions
Problems	<ul style="list-style-type: none"> • Integrating data collection device into production equipment is burdensome • Customers want to clean the installation wiring of the production equipment • Customers want to use the collected DATA easily
Solutions	<ul style="list-style-type: none"> • Accurately measure equipment data such as temperature, humidity and vibration with VZ20X • Gather and leverage DATA in GA10
Features	<ul style="list-style-type: none"> • The VZ20X is space-saving and easy to install • GA10 can be easily connected to VZ20X to easily create an easy-to-use screen • AI supports predictive maintenance of equipment
