Yokogawa Meters and Instruments Releases New Digital Earth Tester for Electrical and Maintenance Personnel

Yokogawa Corporation of America is pleased to announce the release of another high quality and well-engineered product, the EY200 Digital Earth Tester. The EY200 will measure earth resistance up to 2,000 ohms using the two pole or three pole methods. It is extremely simple to use via one button and one switch operation. The EY200 is compact, lightweight and includes a complete test kit.

The Yokogawa EY200 was developed for maintenance personnel and technicians to help insure proper wiring and grounding of electrical equipment and systems. Confirming the proper wiring and grounding will help to reduce power quality issues and potential safety hazards. The Yokogawa EY200 compliments the Yokogawa portfolio of portable test instruments, including digital multimeters, clamp-on meters, insulation testers, and portable power monitors.

The Yokogawa EY200 is dust and water resistant (IP54 rated), CE compliant and CAT III 300 V rated. Standard accessories provided with the unit are two and three pole test leads, earth spikes, soft case, shoulder strap, 6 AA batteries and an instruction manual.

The Yokogawa EY200 is available through Yokogawa distributors and representatives at a suggested list price of $575. For more information on the Yokogawa EY200 Digital Earth Tester and additional Yokogawa Meter and Instruments products, visit www.yokogawa-usa.com or contact us via email at meters-instr@us.yokogawa.com.

About Yokogawa Corporation of America

Yokogawa Corporation of America is the North American division of Yokogawa Electric Corporation and a key part of Yokogawa's global network of 25 manufacturing facilities and 80 companies spanning 54 countries. Since its founding in 1915, the US $3 billion company has been engaged in cutting-edge research and innovation, securing more than 7,200 patents and registrations, including the world's first digital sensors for flow and pressure measurement. Industrial automation and control, test and measurement, information systems and industry support are the core businesses of Yokogawa.
