CAMS Operator Training

To explain the functionality of the Consolidated Alarm Management Software for HIS (CAMS for HIS) in normal operation (run-time) this training is made. After completion of the training participants will be able to

- Explain the difference between CAMS and CAMS for HIS
- Recall and use the different type of lists on the operator station
- Interpret the different area in the CAMS monitor
- Use the primary CAMS functions (filtering, sorting, shelving, eclipsing and load shedding)
- Modify the CAMS for HIS monitor layout in real-time (if security allows this)
- Create static and dynamic filters

Who should attend? CENTUM VP engineers using the Human Interface Station (HIS) for daily operation

Prerequisite knowledge Participants should have completed the CENTUM VP Operators course previously.

Program **Day 1:**

- Difference between CAMS and CAMS for HIS
- The CAMS concept
- The scope of CAMS for HIS
- Message monitor basic layout
- Run-time aspect of CAMS (filtering, sorting, eclipsing etc.)
- Static alarm suppression
- Exercises
- Evaluation
