

Certificate of Neutralization

For the protection of Yokogawa Corporation of America employees, and in accordance with EPA Regulations (OCFR260, 261) and OSHA Standards (29CFR 1910), Material Safety Data Sheets (MSDS) are required for any instruments that you are shipping to us that have been installed, or have had surfaces in contact with, media that may be harmful to people.

This certificate confirms that the required information has been provided and that effective neutralization of any such media has been accomplished prior to shipment.

A Return Authorization Number (RA#) will be provided after this completed certificate has been returned to Yokogawa Corporation of America. Shipments containing instrumentation exposed to unknown media will not be processed until necessary information is received. If not received within a reasonable time, the equipment will be returned to the sender without further processing.

☐ MSDS for this media is included (not required for air, potable water, or steam)

☐ True — This unit has never been installed or exposed to an operational system where it could have become contaminated or radioactive.

Note: If the unit is not cleaned prior to return, additional cleaning fees may apply.

I attest that the following item(s) being shipped will be appropriately neutralized prior to shipment.

Safety Officer: _____

Phone (if different from RA requester): _____

Model Number(s): _____

Serial Number(s): _____

Process Media in Contact with Instrument(s): _____
