# General <br> Daqstation <br> DX364 

## GS 04L70B01-01E

## ■ OVERVIEW

The DX364 is a paperless recorder corresponding $1 / 2$ DIN or $3 \times 6$ (inch) recorders. It can be hooked up to network via Ethernet, which enables to inform by E-mail and to monitor on Web site as well as to transfer files by using FTP. Also, it can communicate with Modbus/TCP.

It comes with a four channel model. As the input signal, a DC voltage, Thermocouple or contact signal can be set to each channel. The data saved on a CF card can be converted by data conversion software to Lotus 1-2-3, Excel, or ASCII format file, facilitating processing on a PC. Not only this, the Viewer software allows a PC to display waveforms on its screen and to print out waveforms.

## STANDARD SPECIFICATIONS

## General Specifications

## Construction

Mounting: Flush panel mounting (on a vertical plane)
Mounting may be inclined downward up to 30 degrees from a horizontal plane.
Allowable panel thickness:
2 to 26 mm
Material: Case, Bezel: drawn steel
Key Cover, Display filter: polycarbonate
Case color:
Case, Bezel, Key Cover : Charcoal grey light
(Munsell 10B 3.6/0.3 or equivalent)
Dimensions:
$72(\mathrm{~W}) \times 144(\mathrm{H}) \times 406(\mathrm{D})^{*} \mathrm{~mm}$
*Rear panel depth and terminal part dimensions not included.
Weight: approx. $2.9 \mathrm{~kg}^{*}$
*without mounting brackets

## Input

Number of inputs:
4 channels
Measurement interval:
$125 \mathrm{~ms}, 250 \mathrm{~ms}, 25 \mathrm{~ms}$ (fast sampling mode*)

* $A / D$ integration time is fixed to 1.67 ms in case of fast sampling mode.

Inputs: DCV (DC voltage), TC (thermocouple) DI (digital input for event recording), DCA (DC current with external shunt resistor attached)

| Input type | Range | Measuring range |  |
| :---: | :---: | :---: | :---: |
| DCV | 20 mV | -20.000 to 20.000 mV |  |
|  | 60 mV | -60.00 to 60.00 mV |  |
|  | 200 mV | -200.00 to 200.00 mV |  |
|  | 2 V | -2.0000 to 2.0000 V |  |
|  | 6 V | -6.000 to 6.000 V |  |
|  | 1-5V | -0.800 to 5.200 V |  |
|  | 20 V | -20.000 to 20.000 V |  |
|  | 50 V | -50.00 to 50.00 V |  |
| TC | $\mathrm{R}^{* 1}$ | 0.0 to $1760.0^{\circ} \mathrm{C}$ | 32 to $3200^{\circ} \mathrm{F}$ |
|  | S*1 | 0.0 to $1760.0^{\circ} \mathrm{C}$ | 32 to $3200^{\circ} \mathrm{F}$ |
|  | B*1 | 0.0 to $1820.0^{\circ} \mathrm{C}$ | 32 to $3308^{\circ} \mathrm{F}$ |
|  | K ${ }^{\text {1 }}$ | -200.0 to $1370.0^{\circ} \mathrm{C}$ | -328 to $2498{ }^{\circ} \mathrm{F}$ |
|  | E*1 | -200.0 to $800.0^{\circ} \mathrm{C}$ | -328.0 to $1472.0^{\circ} \mathrm{F}$ |
|  | $\mathrm{J}^{* 1}$ | -200.0 to $1100.0^{\circ} \mathrm{C}$ | -328.0 to $2012.0^{\circ} \mathrm{F}$ |
|  | $\mathrm{T}^{* 1}$ | -200.0 to $400.0^{\circ} \mathrm{C}$ | -328.0 to $752.0^{\circ} \mathrm{F}$ |
|  | $\mathrm{N}^{\star 1}$ | 0.0 to $1300.0^{\circ} \mathrm{C}$ | 32 to $2372^{\circ} \mathrm{F}$ |
|  | W*2 | 0.0 to $2315.0^{\circ} \mathrm{C}$ | 32 to $4199^{\circ} \mathrm{F}$ |
|  | L*3 | -200.0 to $900.0^{\circ} \mathrm{C}$ | -328.0 to $1652.0^{\circ} \mathrm{F}$ |
|  | U*3 | -200.0 to $400.0^{\circ} \mathrm{C}$ | -328.0 to $752.0^{\circ} \mathrm{F}$ |
|  | WRe*4 | 0.0 to $2400.0^{\circ} \mathrm{C}$ | 32 to $4352^{\circ} \mathrm{F}$ |
| DI | DCV input (TTL) | OFF : less than 2.4 V ON : more than 2.4 V |  |
|  | Contact input | Contact ON/OFF |  |

*1 R, S, B, K, E, J, T, N: IEC 60584-1, DIN EN 60584-1, JIS C 1602
*2 W: W-5\% Re/W-26\% Re (Hoskins Mfg. Co.) ASTM E988-96
(Type C equivalent of OMEGA Engineering Inc.)
*3 L: Fe-CuNi, DIN43710, U: Cu-CuNi, DIN43710
*4 WRe: W-3\%Re/W-25\%Re (Hoskins Mfg. Co.), ASTM E988-96
(Type D equivalent of OMEGA Engineering Inc.)

A/D integration time:
$20 \mathrm{~ms}(50 \mathrm{~Hz}), 16.7 \mathrm{~ms}(60 \mathrm{~Hz})$, or AUTO selectable (automatic selection by detection of power supply frequency) A/D integration time is fixed to 1.67 ms $(600 \mathrm{~Hz})$ in case of fast sampling mode.
Thermocouple burnout:
Burnout upscale/downscale function can be switched on/off (for each channel). Burnout upscale/downscale selectable Normal: Less than $2 \mathrm{k} \Omega$, Burn out: More than $100 \mathrm{k} \Omega$
Detection current: approx. $10 \mu \mathrm{~A}$
$1-5 \mathrm{~V}$ range burnout:
Burnout upscale/downscale function can be switched on/off (for each channel). Burnout upscale/downscale selectable Upscale burnout: More than $+10 \%$ of configured span
Downscale burnout: Less than -5\% of configured span
Moving average:
Moving average on/off selectable for each channel
Moving average cycles 2 to 400 selectable
Calculation:
Differential computation:
Between any two channels Available for DCV, TC and DI ranges.
Linear scaling:
Available for DCV, TC and DI ranges.
Scaling limits: -30000 to 30000
Decimal point: user-selectable
Engineering unit: user-definable, up to
6 characters
Over value: Exceeds $\pm 5 \%$ of scaling limits (on/off selectable)
Square root:
Available for DCV range.
Scaling limits: -30000 to 30000
Decimal point: user-selectable
Engineering unit : user-definable, up to 6 characters
Low level cut off: 0.0 to $5.0 \%$ of display span
Over value: Exceeds $\pm 5 \%$ of scaling limits (on/off selectable)
1-5VDC scaling:
Available for 1-5VDC range.
Scaling limits: -30000 to 30000
Display span limit: 0.800 to 5.200
Decimal point: user-selectable
Engineering unit : user-definable, up to 6 characters
Low level cut off: Fixed to lower span limit
Over value: Exceeds $\pm 5 \%$ of scaling limits (on/off selectable)

## Display

Display unit:
3.5-inch TFT color LCD (VGA, $240 \times 320$ pixels)
Note) In the part of crystal display, there are some pixels that can't always turn on or off. Please understand that the brightness of screen looks uneven because of characteristics of crystal display, but it is not out of order.

Display group:
Number of assignable channels for one group: 4 channels
Display color:
Trend/Bargraph:
Selectable from 24 colors
Background: White or black selectable
Trend display:
Trend display type: horizontal
Number of indication channels: 4 channels per display (maximum)
Line width:
1 , 2, and 3 pixels selectable
Scales: Maximum 4 scales. Bargraph, green band area and alarm mark can be displayed on scale display. Number of divisions: Selectable from 4 to 12 or C10 ( 10 divisions by main scale mark and scale values are displayed on $0,30,50,70$ and $100 \%$ position).
Waveform span rate: 15,30 sec., $1,2,5,10,15,20,30 \mathrm{~min}$. , 1, 2, 4, 10 hours/div selectable
Bargraph display:
Direction: Vertical
Number of indication channels: 4 channels per display
Scales: Green band area and alarm mark can be displayed on scale display. Number of divisions: Selectable from 4 to 12 Reference position: Bottom
Display renewal rate: 1 s
Digital indication:
Number of indication channels: 4 channels per display
Number of display:
Display renewal rate: 1 s
Information display:
Alarm summary display:
Display the list of latest 1000 alarms summary.
Jump to historical trend display by cursor pointing.
Message summary display:
Display the list of latest 450 messages and time. (includes 50 added messages) Jump to historical trend display by cursor pointing.
Memory information:
Display the file list in internal memory. Jump to historical trend display by cursor pointing.
Report information:
Display the report data in internal memory.
Modbus status: Display the Modbus status.
Relay status:
Display the on/off status of internal switch and relay output.

Log display:
Log display types:
Login log, error log, communication log, FTP log, Web log, E-mail log, SNTP
log, DHCP log, Modbus log
Tags:
Number of characters:
16 characters maximum

## Messages:

Number of characters:
32 characters maximum
Number of messages:
100 messages (including 10 free
messages)
Message adding function:
Message can be added on historical display.
Other display contents:
Status display area:
An icon appears here when an alarm is occurring, when the storage media is full or not mounted, when the CF card is error, or when the device information is being output.
Trend display area:
Grid lines (number of divisions selectable from 4 to 12), hour : minutes on grid, trip levels (line widths are selectable from 1, 2 and 3 pixels)
Data referencing function:
Display the retrieved data (display data or event data) from internal or external memory.
Time axis operation:
Display magnification or reduction, scroll by key operation
Display auto scroll function:
Display group of monitor display (trend display, bargraph display and digital display) automatically changes in a preset interval (5, 10, 20, 30 s and 1 min ).
LCD saver function:
The LCD backlight automatically dims or off (selectable) if no key is touched for a certain preset time (can be set from 1, 2, $5,10,30$, and 60 min ).
Display auto return function:
The display type automatically returns to registerd display type if no key is touched for a certain preset time (can be set from $1,2,5,10,20,30$ and 60 min )
Temperature unit:
${ }^{\circ} \mathrm{C}$ or ${ }^{\circ} \mathrm{F}$ selectable

## Data Saving Function

External storage medium:
Medium: CompactFlash memory card (CF card)
Format: FAT16 or FAT32
Capacity: Maximum 32 GB
Internal memory:
Medium: Flash memory
Capacity: Selectable from 80MB
Maximum number of files can be saved: 400 files (total number of display data file and event data file)
Manual saving:
Data files in internal memory can be saved manually.
Selectable form all data saving or selected data saving.

Drive: CF card or USB flash drive
Automatic saving:
Display data:
Periodic saving to CF card
Event data:
In case of trigger free...Periodic saving
to CF card
In case of using trigger...Save the data when sampling is finished
Media FIFO function:
Allows the oldest file to be deleted and the newest file to be saved if the free space on the CF card is insufficient or the number of files exceeds 1000 files. (on/off seletablle)
Data Saving Period:
Display data file:
Linked with the waveform span rate
Event file: Linked with the specified sampling period
Event File Sampling Period:
Selectable from $25,125,250,500 \mathrm{~ms}$, and $1,2,5,10,30,60,120,300$, and $600 \mathrm{~s}^{*}$
*Sampling period faster than measurement interval can not be selected.
Measurement data File:
The following two file types can be created. Event file (stores instantaneous values sampled periodically at a specified sampling rate)
Display data file (stores the maximum and minimum values for each waveform span rate from among measured data sampled at measurement intervals)
Files can be created in the following combinations.
(a) Event file + display data file
(b) Display data file only
(c) Event file only

Data format: YOKOGAWA private format (Binary)
Maximum data size per file: 8,000,000 byte ( 8 MB )
Data per channel: Display data file:

Measurement data...... 4 byte/data
Mathematical data...... 8 byte/data Event data file:

Measurement data...... 2 byte/data
Mathematical data...... 4 byte/data
Sampling time:
The sampling time per file (8MB) during manual data saving can be determined by the formula
"number of data items per channel $\times$ interval of data saving."
This logic is explained in more detail below:

1) When handling display data files only If we assume that the number of measuring channels is 4 , the number of computing channels is 12 , and the display update interval is $30 \mathrm{~min} / \mathrm{div}$ ( 60 sec waveform span rate), then: Number of data items per channel = $8,000,000$ bytes/( 8 bytes(time stamp) $+4 \times 4$ bytes $+12 \times 8$ bytes $)=66,666$ data items Sampling time per file $=66,666 \times 60 \mathrm{sec}=$ $3,999,960 \mathrm{sec}=$ approx. 46 days
2) When handling event files only

If we assume that the number of measuring channels is 4 , the number of computing channels is 12 , and the data saving interval is 1 sec , then : Number of data items per channel = $8,000,000$ bytes/(8 bytes(time stamp) $+4 \times 2$ bytes $+12 \times 4$ bytes) $=125,000$ data items Sampling time per file $=125,000 \times 1 \mathrm{sec}=$ $125,000 \mathrm{sec}=$ approx. 34 hours
3) When handling both display data files and event files
The sampling time is calculated by defining the size of data items in a display data file as $8,000,000$ bytes and the size of data items in an event data file as $8,000,000$ bytes. The method of calculation is the same as shown above.

Examples of Sampling Time for 1 file ( 8 MB$)^{*}$ : *If sampling time exceeds 31 days, data file is divided.
In case measurement ch $=\mathbf{4 c h}$, mathematical $\mathrm{ch}=0 \mathrm{ch}$ Display data file (approx.)

| Waveform span <br> rate (time/div) | 15 s | 30 s | 1 min | 2 min | 5 min | 10 min |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Data saving <br> period | 0.5 s | 1 s | 2 s | 4 s | 10 s | 20 s |
| Sampling time | 46.3 h | 3 days | 7 days | 15 days | 38 days | 77 days |

## Event data file (approx.)

| Data saving <br> period | 25 ms | 125 ms | 0.5 s | 1 s | 2 s | 5 s | 10 s |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Sampling time | 3.5 h | 17.4 h | 2 days | 5 days | 11 days | 28 days | 57 days |

Trigger function:
Selectable from FREE or TRIG for event data saving.
Trigger mode:
Selectable from free, single or repeat trigger
Data length:
Selectable from 10, 20, 30 min, 1, 2, 3 ,
$4,6,8,12$ hour, $1,2,3,5,7,10,14,31$ day
Pre trigger: Selectable from $0,5,25,50,75,95$, 100\%
Trigger source:
Key operation, communication command or event action function
Manual sample data:
The measuring and computing data can be saved manually to the internal memory and CF card.
Trigger: Key operation, communication command or event action function
Data format:
ASCII
Max. number of data:
400 data (if exceeds 400 data, oldest data is overwritten)

Report data (only for MATH option):
Types: Hourly, daily, hourly + daily, daily + weekly, and daily + monthly
Data format:
Drive: $\quad \begin{aligned} & \text { ASCII } \\ & \text { CF card }\end{aligned}$
Display hard copy:
Trigger: Key operation, communication command or event action function
Data format:
png format
Drive/output:
CF card or communication interface
Data file retrieving function:
Data file in CF card or USB flash drive can be retrieved and displayed.
Retrieved data file:
Display data file or event data file
Saving and retrieving of configuration data:
Configuration information can be saved and retrieved as ASCII data.
Drive: CF card or USB flash drive

## Alarm Function

Number of alarm levels:
Up to four levels for each channel
Alarm types:
High and low limits, differential high and low limits, high and low rate-of-change limits and delay high and low
Alarm delay time: 1 to 3600 s
Interval time of rate-of-change alarms:
The measurement interval times 1 to 32
Display: The alarm status (type) is displayed in the digital value display area upon occurrence of an alarm. A common alarm indication is also displayed.
Alarming behavior: non-hold or hold-type can be selectable for common to all channels.
Hysteresis: On/off selectable (common to measurement channels, mathematical channels or external channels) 0.0 to $5.0 \%$ of display span (or scaling span)
Outputs:
Output: relay output (optional)
Number of internal switch:
30 points
Internal switch action:
AND/OR
Number of relay output points:
2 points (optional)
Relay action:
Energized/deenergized, hold/non-hold, AND/OR, Alarm ACK (normal/reset) alarm reflash selectable.
Alarm no logging function:
When alarm occurs, only internal switch or relay output is activated. There are no alarm display on screen and no record on alarm summary. On/off selectable for each channel and alarm level.
Memory:
The times of alarm occurrences/recoveries, alarm types, etc. are stored in the memory.
Up to 1000 latest alarm events are stored.

## Event action function

General：Particular action can be executed by particular event．
Number of event action： 40 actions can be set
Event list：

| Event | Level／Edge | Description |
| :--- | :--- | :--- |
| Remote | Level／Edge | Action by remote control signal |
| Relay | Level／Edge | Action by relay operation |
| Internal <br> switch | Level／Edge | Action by internal switch operation |
| Alarm | Level／Edge | Action by any alarm |
| Timer | Edge | Action by timer time up |
| Match time | Edge | Action by time up of match time timer |
| USER key | Edge | Action by USER key operation |

Action list：

| Action | Level／Edge | Description |
| :--- | :--- | :--- |
| Memory <br> start／stop | Level | Memory start and stop |
| Memory start | Edge | Memory start |
| Memory stop | Edge | Memory stop |
| Event trigger | Edge | Event data sampling start |
| Alarm ACK | Edge | Alarm ACK |
| Math start／ <br> stop | Level | Computation start and stop |
| Math start | Edge | Computation start |
| Math stop | Edge | Computation stop |
| Math reset | Edge | Computation reset |
| Manual <br> sample | Edge | Manual sample |
| Snapshot | Edge | Save display image to external media |
| Message <br> input | Edge | Message writing |
| Waveform <br> span rate <br> change | Level | Change waveform span rate |
| Display data <br> save | Edge | Save currently sampled display <br> data to internal memory as a file |
| Event data <br> save | Edge | Save currently sampled event <br> data to internal memory as a file |
| Relative time <br> timer reset | Edge | Reset relative time timer |
| Display <br> group <br> change | Edge | Change to specified display group |
| Time <br> adjustment | Edge | Adjust internal clock to the <br> nearest hour |
| Flag | Level | Normal：＂0＂，Event：＂1＂ |
| Setting file <br> load | Edge | Load setting file from CF card |
| （up to 3 setting files）． |  |  |
| Display <br> Freeze <br> ／Active | Edge | Freeze or Active the display |
| Memory <br> clear | Edge |  |

## Security functions

General：Login function or key lock function can be set for each key operation or communication operation．
Key lock function： On／off and password can be set for each operation key and FUNC operation．
Login function：
User name and password to login can be set． User level and number of users：

System administrator：5 users General users：$\quad 30$ users 10 kinds of login mode can be set for general users．
Clock
Clock：With calendar function（year of grace）
Clock accuracy：
$\pm 10 \mathrm{ppm}$ ，excluding a delay（of 1 second，maximum）caused each time the power is turned on．
Time setting method：
Key operation，communication
command，event action function or SNTP client function
Time adjustment method：
During memory sample：
Adjust 40 ms per second（No influence for measurement period）
During memory stop：
Adjust at a time
Time zone：
Time difference from GMT：
Settable from－13：00 to 13：00
Date display format： Selectable from $\mathrm{YYYY/MM/DD}, \mathrm{MM/DD/}$ YYYY，DD／MM／YYYY or DD．MM．YYYY
DST function（summer／winter time）：
The time at which the daylight savings time adjustment is automatically calculated and configured．

## Log（exponential）Display Function

Input voltage measurements indicated in Log （common logarithm）
$Y=10(S U-S L) \times(X-V L) /(V U-V L)+S L$
where，
x ：input voltage；VL：span min．value；VU：span max． value；SL：exponent scale min．value；SU：exponent scale max．value；Y：displayed value Input Range：

DC voltage input（DCV：20／60／200 mV， 2／6／20／50 V）voltage value，display span min．value＞display span max．value Scaling Range：

1．0E＿15－1．0E＋15
Max． 15 decades
Scale value：exponent min．value＜ exponent max．value
Data Display Range：
1．0E＿15－1．0E＋15
（within the same decade，1．0EDロロ－ 9．9Eपロロ）
Number of displayed mantissa digits， able to select 2 or 3 digits（in basic setting mode）．
3 digit time 1．0E＿15－1．0E＋15

Units: $\quad$ Optional setting available (up to 6 characters)
Alarm: $\quad \mathrm{H} / \mathrm{L} / \mathrm{T} / \mathrm{t}$ only
Set alarm values using voltage values.
Alarm hysteresis fixed at 0\%.
Relationship between input voltage and digital value display
Partial expanded display: N/A
Differential computation: N/A
Calibration correction (/CC1): N/A
Restriction for specifying the computation function
(M1): computation results in an error when the LOG range selection channel is used in the computation equation or the report channel.

## Simulation function

Event action (including remote control) or communication command allow the display updating function to disable and the internal memory and trend display to clear.

## Communication Functions

Electrical specifications:
Confirms to IEEE802.3 (DIX specification for Ethernet frames)
Connection:
Ethernet (10BASE-T)
Protocols: TCP, UDP, IP, ICMP, ARP, DHCP, HTTP, FTP, SMTP, SNTP, Modbus, DX private
E-mail inform function:
E -mail is sent by events as below.

- Alarm occurring/alarm canceling
- Recover from power failure
- Memory end
- Storage medium error, FTP client function error
- Specified time period
- Report data time up (only for mathematical option)
FTP client function:
Data file auto-transfer from DX
Transferred data file: Display data file, event data file, report data file and display image file
FTP server function:
File transfer from DX, file elimination (external media only), directory operation and file list output are available by request from host computer.
Web server function:
Display image of DX and alarm
information can be displayed on web
browser software
SNTP client function:
The time on DX can be synchronized to
the time of a SNTP server.
SNTP server function:
The DX can operate as a SNTP server.
DHCP client function:
Network address configuration can be obtained automatically from DHCP server.
Obtained information:
IP address, subnet mask, default gateway and DNS information

Modbus client function:
Reading or writing of measurement data on other instruments are available by Modbus protocol.
Mathematical option is required to read the data from other instruments.
Modbus server function:
Output of measurement data from DX is available by Modbus protocol.
Setting/measurement server function: Operation, setting or output of measurement data are available by DX private protocol.
Maintenance/test server function:
Output connection information or network information of the Ethernet communication.
Instrument information server function: Output instrument information such as serial number or model name of DX.

## USB interface

USB interface specification:
Based on Rev1.1, host function
Number of ports:
1 ports (Front)
Power supply:
$5 \mathrm{~V}, 500 \mathrm{~mA}$ * 1
Available USB devices:
Keyboard:
104/89 keyboard (US) based on USB
HID Class Ver.1.1
External medium:
USB flash drive (some of USB flash
drives may not be supported by DX364)
*1: For low powered devices (bus power < 100 mA ): $5 \mathrm{~V} \pm 5 \%$
For high powered devices (bus power < 500 mA ): $5 \mathrm{~V} \pm 10 \%$

## Power Supply

Rated power supply:
100 to 240 VAC (automatic switching)
Allowable power supply voltage range:
90 to 132 or 180 to 264 VAC
Rated power supply frequency:
$50 / 60 \mathrm{~Hz}$ (automatic switching)
Power consumption:

| Supply voltage | LCD off | Normal | Max. |
| :--- | :---: | :---: | :---: |
| 100 VAC | 14 VA | 16 VA | 26 VA |
| 240 VAC | 20 VA | 23 VA | 35 VA |

Allowable interruption time:
Less than 1 cycle of power supply frequency

## Other Specifications

Memory backup :
A built-in lithium battery backs up
the setup parameters (battery life
: approximately 10 years at room
temperature).
Insulation resistance:
Each terminal to ground terminal: $20 \mathrm{M} \Omega$ or greater (at 500 VDC )
Dielectric strength:
Power supply to ground terminal: 2300 VAC ( $50 / 60 \mathrm{~Hz}$ ), 1 min

Contact output terminal to ground terminal: 1600 VAC ( $50 / 60 \mathrm{~Hz}$ ), 1 min
Measuring input terminal to ground terminal: 1500 VAC ( $50 / 60 \mathrm{~Hz}$ ), 1 min
Between measuring input terminals: $1000 \operatorname{VAC}(50 / 60 \mathrm{~Hz}), 1 \mathrm{~min}$
Between remote control terminal to ground terminal: 1000 VDC, 1 min
Safety and EMC Standards
CSA: CAN/CSA-C22.2 No. 61010-1, CAN/ CSA-C22.2 No. 61010-2-030 Overvoltage Category II or I*1, Pollution Degree 2*2, Measurement Category II*3
UL: UL 61010-1, UL 61010-2-030 (CSA NRTL/C)
Overvoltage Category II or I*1, Pollution Degree 2*2, Measurement Category II*3
CE, UKCA:
EMC directive:
EN 61326-1 Class A, Table 2 (For use
in industrial locations) compliant
EN 61000-3-2 compliant
EN IEC 61000-3-2 compliant
EN 61000-3-3 compliant EN 55011 Class A, Group 1 compliant
Low voltage directive:
EN 61010-1, EN IEC 61010-2-030 compliant, Overvoltage Category II or I ${ }^{\star 1}$, Pollution Degree 2*2, Measurement Category II*3
EU RoHS directive: EN IEC 63000 compliant
WEEE directive: Compliant
EMC Regulatory Arrangement in Australia and New Zealand (RCM): EN 55011 Class A, Group 1 compliant
KC marking: KS C9811, KS C9610-6-2 compliant
*1: Overvoltage Category
Describes a number which defines a transient overvoltage condition. It implies the regulation for impulse withstand voltage. "Il" applies to electrical equipment which is supplied from fixed installations like distribution boards.
II: Applied to standard power supply (100240 VAC)
I: Applied to /P1 option (24 VDC/AC)
*2: Pollution Degree
Describes the degree to which a solid, liquid, or gas which deteriorates dielectric strength or surface resistivity is adhering. "2" applies to normal indoor atmosphere. Normally, only non-conductive pollution occurs.
*3: Measurement Category II Applies to measuring circuits connected to low voltage installation, and electrical instruments supplied with power from fixed equipment such as electric switchboards.
$\square$ Normal Operating Conditions
Power voltage:
90 to 132 or 180 to 250 VAC
Power supply frequency: $50 \mathrm{~Hz} \pm 2 \%, 60 \mathrm{~Hz} \pm 2 \%$
Ambient temperature: 0 to $50^{\circ} \mathrm{C}$
Ambient humidity: $20 \%$ to $80 \%$ RH (However, less than moisture content of $40^{\circ} \mathrm{C} 80 \% \mathrm{RH}$ at $40^{\circ} \mathrm{C}$ or more), No condensation
Vibration: 10 to $60 \mathrm{~Hz}, 0.2 \mathrm{~m} / \mathrm{s}^{2}$ or less
Shock: Not acceptable
Magnetic field:
$400 \mathrm{~A} / \mathrm{m}$ or less (DC and $50 / 60 \mathrm{~Hz}$ )
Noise:
Normal mode ( $50 / 60 \mathrm{~Hz}$ ):
DCV: The peak value including the signal must be less than 1.2 times the measuring range.
TC: The peak value including the signal must be less than 1.2 times the measuring thermal electromotive force.
Common mode voltage ( $50 / 60 \mathrm{~Hz}$ ):
30 Vrms AC, $\pm 60 \mathrm{VDC}$, or less for all ranges (Maximum common mode noise voltage: 250 Vrms AC $(50 / 60 \mathrm{~Hz})$ )
Maximum noise voltage between channels $(50 / 60 \mathrm{~Hz})$ : 250 Vrms AC or less
Mounting position:
Can be inclined up to 30 deg backward.
Mounting at an angle away from the perpendicular is not acceptable.
Warm-up time: At least 30 min after power on
Installation location: In-room
Altitude: Less than 2000 m

## Standard Performance

Measuring and Recording Accuracy:
The following specifications apply to operation of the recorder under standard operation conditions. Temperature:
$23 \pm 2^{\circ} \mathrm{C}$
Humidity:
$55 \% \pm 10 \% \mathrm{RH}$
Power supply voltage:
90 to 132 or 180 to 250 VAC
Power supply frequency:
$50 / 60 \mathrm{~Hz} \pm 1 \%$
Warm-up time:
At least 30 min .
Other ambient conditions such as vibration should not adversely affect recorder operation.

| Input | Range | Measurement accuracy (digital display) |  | Max. resolution of digital display |
| :---: | :---: | :---: | :---: | :---: |
|  |  | A/D integration time: 16.7 ms or more | A/D integration time: <br> 1.67 ms (fast sampling mode) |  |
| DCV | 20 mV | $\pm(0.05 \%$ of rdg + 12 digits) | $\pm(0.1 \%$ of rdg +40 digits) | $1 \mu \mathrm{~V}$ |
|  | 60 mV | $\pm(0.05 \%$ of rdg +3 digits) | $\pm(0.1 \%$ of rdg +15 digits) | $10 \mu \mathrm{~V}$ |
|  | 200 mV |  |  | $10 \mu \mathrm{~V}$ |
|  | 2 V | $\pm(0.05 \%$ of rdg + 12 digits) | $\pm(0.1 \%$ of rdg +40 digits) | $100 \mu \mathrm{~V}$ |
|  | 6 V | $\pm(0.05 \%$ of rdg +3 digits) | $\pm(0.1 \%$ of rdg + 15 digits) | 1 mV |
|  | $1-5 \mathrm{~V}$ |  |  | 1 mV |
|  | 20 V |  |  | 1 mV |
|  | 50 V |  |  | 10 mV |
| TC (Excluding RJC accuracy) | R | $\begin{aligned} & \pm\left(0.15 \% \text { of rdg }+1^{\circ} \mathrm{C}\right) \text { However, } \\ & \mathrm{R}, \mathrm{~S}: \\ & \pm 37^{\circ} \mathrm{C} \text { at } 0 \text { to } 100^{\circ} \mathrm{C} \\ & \pm 1.5^{\circ} \mathrm{C} \text { at } 100 \text { to } 300^{\circ} \mathrm{C} \\ & \mathrm{~B}: \\ & \pm 2^{\circ} \mathrm{C} \text { at } 400 \text { to } 600^{\circ} \mathrm{C} \\ & \text { Accuracy at less than } 400^{\circ} \mathrm{C} \text { is not } \\ & \text { guaranteed. } \\ & \hline \end{aligned}$ | $\pm\left(0.2 \%\right.$ of rdg $\left.+4^{\circ} \mathrm{C}\right)$ However, R, S: <br> $\pm 10^{\circ} \mathrm{C}$ at 0 to $100^{\circ} \mathrm{C}$ <br> $\pm 5^{\circ} \mathrm{C}$ at 100 to $300^{\circ} \mathrm{C}$ <br> B: <br> $\pm 7^{\circ} \mathrm{C}$ at 400 to $600^{\circ} \mathrm{C}$ <br> Accuracy at less than $400^{\circ} \mathrm{C}$ is not guaranteed. | $0.1{ }^{\circ} \mathrm{C}$ |

|  | WRe | $\pm\left(0.2 \%\right.$ of rdg $\left.+2.5^{\circ} \mathrm{C}\right)$ However, $\pm 4^{\circ} \mathrm{C}$ at 0 to $200^{\circ} \mathrm{C}$ | $\begin{aligned} & \pm\left(0.3 \% \text { of rdg }+10^{\circ} \mathrm{C}\right) \text { However, } \\ & \pm 18^{\circ} \mathrm{C} \text { at } 0 \text { to } 200^{\circ} \mathrm{C} \end{aligned}$ |  |

Measurement accuracy in case of scaling (digits):
$=$ measurement accuracy (digits) $\times$ scaling
span (digits)/measurement span (digits) +2 digits
Decimals are rounded off to the next highest number.
Reference junction compensation:
INT (internal) /EXT (external)
selectable (common for all channels)
Reference junction compensation accuracy:
Types R, S, B, W, WRe: $\pm 1.0^{\circ} \mathrm{C}$
Types K, J, E, T, N, L, U: $\pm 0.5^{\circ} \mathrm{C}$
(Above $0^{\circ} \mathrm{C}$, input terminal temperature
is balanced. The internal reference
junction compensation of Type B is fixed to $0^{\circ} \mathrm{C}$.)
Maximum allowable input voltage:
$\pm 60$ VDC (continuous) for all input
ranges

Input resistance:
Approx. $10 \mathrm{M} \Omega$ or more for DCV ranges of 200 mVDC or less and TC
Approx. $1 \mathrm{M} \Omega$ for more than 2 VDC ranges
Input source resistance:
DCV, TC: $2 \mathrm{k} \Omega$ or less
Input bias current:
10 nA or less (when burnout function does not work)
Maximum common mode noise voltage:
250 Vrms AC ( $50 / 60 \mathrm{~Hz}$ )
Maximum noise voltage between channels:
250 Vrms AC ( $50 / 60 \mathrm{~Hz}$ )
Interference between channels:
120 dB (when the input source resistance is $500 \Omega$ and the inputs to other channels are 30 V )

Common mode rejection ratio:
A/D integration time 20 ms :
More than $120 \mathrm{~dB}(50 \mathrm{~Hz} \pm 0.1 \%$, $500 \Omega$ imbalance between the minus terminal and ground)
A/D integration time 16.7 ms : More than $120 \mathrm{~dB}(60 \mathrm{~Hz} \pm 0.1 \%$, $500 \Omega$ imbalance between the minus terminal and ground)
A/D integration time 1.67 ms : More than $80 \mathrm{~dB}(50 / 60 \mathrm{~Hz} \pm 0.1 \%$, $500 \Omega$ imbalance between the minus terminal and ground)
Normal mode rejection ratio:
A/D integration time 20 ms : More than $40 \mathrm{~dB}(50 \mathrm{~Hz} \pm 0.1 \%)$
A/D integration time 16.7 ms : More than $40 \mathrm{~dB}(60 \mathrm{~Hz} \pm 0.1 \%)$
A/D integration time 1.67 ms : $50 / 60 \mathrm{~Hz}$ is not rejected.

## Effects of Operating Conditions

Ambient temperature: (Only for 16.7 ms A/D integration time or more)
With temperature variation of $10^{\circ} \mathrm{C}$ DCV, TC: $\pm(0.1 \%$ of $\mathrm{rdg}+0.05 \%$ of range) or less Excluding the error of reference junction compensation
Power supply:
With variation within 90 to 132 V and 180 to 250 VAC ( $50 / 60 \mathrm{~Hz}$ ): Within measurement accuracy With variation of $\pm 2 \mathrm{~Hz}$ from rated power frequency (at 100 VAC): Within measurement accuracy
Magnetic field:
AC ( $50 / 60 \mathrm{~Hz}$ ) and DC $400 \mathrm{~A} / \mathrm{m}$ fields: $\pm$ ( $0.1 \%$ of rdg +10 digits) or less
Input source resistance:
(1) $D C V$ range (with variation of +1 kV )

200 mVDC range or less: $\pm 10 \mu \mathrm{~V}$ or less
2 VDC range or greater: $\pm 0.15 \%$ of rdg or less
(2) TC range (with variation of $+1 \mathrm{k} \Omega$ ) $\pm 10 \mu \mathrm{~V}$

## Transport and Storage Conditions

The following specifies the environmental conditions required during transportation from shipment to the start of service and during storage as well as during transportation and storage if this instrument is temporarily taken out of service.
No malfunction will occur under these conditions without serious damage, which is absolutely impossible to repair; however, calibration may be necessary to recover normal operation performance.
Ambient temperature: $-25^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$
Humidity: $5 \%$ to $95 \%$ RH (No condensation is allowed.)
Vibration: 10 to $60 \mathrm{~Hz}, 4.9 \mathrm{~m} / \mathrm{s}^{2}$ maximum
Shock: $\quad 392 \mathrm{~m} / \mathrm{s}^{2}$ maximum (while being packed)

## ■ SPECIFICATIONS OF OPTIONAL FUNCTIONS

Alarm Output Relays (IA1)
An alarm signal is output from the rear panel as a relay contact signal.
Number or output:
2 points
Relay contact rating:
250 VDC/0.1 A (for resistance load), 250
VAC ( $50 / 60 \mathrm{~Hz}$ )/3 A
Terminal configuration:
SPDT (NO-C-NC). Energized-at-alarm/ deenergized-at-alarm,
AND/OR, and hold/non-hold actions are selectable.

Fail/Status Output (/F1)
The relay contact output on the rear panel indicates the occurrence of CPU failure or selected status.
FAIL output relay:
The relay contact output on the rear panel indicates the occurrence of CPU failure.
Relay operation: CPU normal:
Energized,
CPU failure:
Deenergized
Status output relay:
The relay contact output on the rear panel indicates the occurrence of selected status
Relay operation: Status detection:
Energized

| Status | Description |
| :--- | :--- |
| Memory <br> status | Relay is energized when internal memory <br> or external storage media is in the following <br> conditions: Abnormality in the internal memory <br> When automatic saving of settings to the <br> external storage media is ON |
|  | - When the remaining space on the external <br> storage medium reaches 10\%. (without <br> Media FIFO function ON) <br> - When an abnormality occurs with the <br> external <br> storage medium, and auto save fails <br> - When the external storage medium is <br> not inserted, operation is same as when <br> automatic saving of settings to the external <br> storage media is Off |
|  | When automatic saving of settings to the <br> external storage media is Off <br> - When the remaining space on the internal <br> memory <br> reaches 10\% |
|  | When the number of data file which is not <br> saved to external storage media exceeds <br> 390 <br> *Not including USB memory connected to the <br> instrument. |
| Measurement | Relay energized upon A/D converter <br> abnormality or burnout detection |
| Failure | Relay energized when communication error <br> occurs in the Modbus client |
| Comm. failure |  |
| Memory stop | Relay energized upon memory stop |

Relay contact rating:
250 VDC/0.1 A (for resistance load), 250 VAC $(50 / 60 \mathrm{~Hz}) / 3 \mathrm{~A}$

## Mathematical Functions (/M1)

Used for calculating data, displaying trends and
digital values, and recording calculated data
assigned to channels.
Channel assignable to calculated data:
Up to 12 channels ( 101 to 112)
Max. character length of expression:
120 characters
Operation:
General arithmetic operations:
Four arithmetic operations, square root, absolute, common logarithm, natural logarithm, exponential, power, relational operations (>, $\geq,<, \leq,=, \neq$ ), logic operations (AND, OR, NOT, XOR)
Statistical operations:
TLOG (Average, maximum, minimum, summation and $P-P$ value of time series data) CLOG (Average, maximum, minimum, summation and $\mathrm{P}-\mathrm{P}$ value of channel series data)
Special operations: PRE (Previous data) HOLD(a):b (Hold data of "b" in case of " $a$ " is not " 0 ") RESET(a):b (Reset data of "b" and restart in case of "a" is not " 0 ") $\operatorname{CARRY}(a): b$ (If "b" exceeds "a", "b-a" becomes computation results)
Conditional operation: [a?b:c] (Execute "b" in case of "a" is not " 0 ", or execute " $c$ " in case of " $a$ " is " 0 ")
Constant: Up to 60 constants (K01 to K60)
Digital data input via communication:

$$
\text { Up to } 24 \text { data (C01 to C24) }
$$

Remote status input:
Remote input status ( $0 / 1$ ) can be used in
mathematical expression Up to 4 inputs (D01 to D04)
Status input:
Internal switch status (S01 to S30), relay status (101 to I02) and flag status (F01 to F08) can be used in mathematical expression
Report functions:
Number of report channels: up to 12 channels
Report type: Hourly, daily, hourly + daily, daily +weekly and daily + monthly
Operation:
Max. 4 types are selectable from average, maximum, minimum, instantaneous and summation
Data format: ASCII
Long term rolling average:
Computation interval:
$1,2,3,4,5,6,10,12,15,20,30 \mathrm{sec}$. , $1,2,3,4,5,6,10,12,15,20,30,60$ min
Number of sampling: 1 to 1500

## 24 VDC/AC Power Supply (/P1)

Rated power supply: 24 VDC or 24 VAC $(50 / 60 \mathrm{~Hz})$
Allowable power supply voltage range:
21.6 to 26.4 VDC/AC

Insulation resistance:
Power supply to ground terminal: $20 \mathrm{M} \Omega$ or greater (at 500 VDC)
Dielectric strength:
Power supply to ground terminal: 500
VAC ( $50 / 60 \mathrm{~Hz}$ ), 1 min
Max. power consumption:

| Supply voltage | LCD off | Normal | Max. |
| :--- | :---: | :---: | :---: |
| 24 VDC | 6 VA | 8 VA | 13 VA |
| $24 \mathrm{VAC}(50 / 60 \mathrm{~Hz})$ | 14 VA | 15 VA | 25 VA |

## Remote Control (/R1)

This option allows four functions to be controlled remotely by a contact input.
Please refer the part of "Event action function" for functions to be controlled.

## Calibration correction function (/CC1)

Corrects the measurement value of each channel using segment linearizer approximation. Number of segment points:

$$
2 \text { to } 16
$$

## APPLICATION SOFTWARE

## DAQSTANDARD for DXAdvanced

(DXA120/S2: Log/Simulation functions setting available)

Operating environment

| OS: | Windows 8.1 (Update 32-bit and 64-bit <br> editions (Supports the desktop mode), <br> Pro Update 32-bit and 64-bit editions <br> (Supports the desktop mode)) <br> Windows 10 (Home 32-bit and 64-bit <br> editions, Pro 32-bit and 64-bit editions, <br> Enterprise 32-bit and 64-bit editions, <br> Enterprise LTSB 32-bit and 64-bit <br> editions, Enterprise LTSC 32-bit and 64- <br> bit editions) <br> Windows 11 (Home 64-bit edition, Pro <br> 64-bit edition, Enterprise 64-bit edition) |
| :--- | :--- |
| Yokogawa will also stop supporting OSs that |  |
| Microsoft Corporation no longer supports. |  |
| Wrocessor and memory: |  |
| Windows 8.1/10: |  |
| Intel Core2 Duo E6300 or faster x64 or |  |
| x86, 2 GB or more |  |
| Windows 11: |  |
| Core-i5 or faster and 8th generation later |  |
| Intel processor, 8 GB or more |  |
| Hard disk: | 100MB or more (Windows 8.1 , Windows |
| 10), 64 GB or more (Windows 11) of free |  |
| space |  |

Display function:
Waveform display, digital display, circular display, list display, report display etc.
File connection display:
Connect data files that are divided because of auto-save during continuous data collecting or power failure, and then display (can connect up to total 5 million)
Section computation:
Maximum, minimum, average, effective and $P-P$ value
Data conversion: File conversion to ASCII, Lotus 1-2-3 or MS-Excel format
Print out: Print out displayed data
<<Contents>> <<|ndex>>

## MODEL AND SUFFIX CODES

| Model code | Suffix code | Optional code | Description |
| :---: | :---: | :---: | :---: |
| DX364 |  |  | Daqstation DX364 4ch, 125ms (Fast sampling mode: 25ms) |
| Internal memory | -1 |  | Standard memory (80MB) |
| External media | -4 |  | CF card (with media) |
| Display language | -2 |  | English, degF, DST (with English DAQSTANDARD) |
| Options |  | IA1 | Alarm output 2 points *1 |
|  |  | /F1 | FAIL/Status output *1 |
|  |  | /M1 | Mathematical functions |
|  |  | /P1 | DC/AC24V power supply |
|  |  | /R1 | Remote control 4points |
|  |  | /CC1 | Calibration correction function |

*1 /A1, /F1 cannot be specified together.

## Application Software

| Model code | Description | O S |

| DXA120/S2 | DAQSTANDARD for DXAdvanced | Windows 8.1/10/11 |

## STANDARD ACCESSORIES

| Product | Qty |
| :--- | :---: |
| Mounting brackets kit | 1set $^{* 1}$ |
| Terminal screws (Spares M4) | 3 |
| DX364 User's Manual | 1 |
| DAQSTANDARD software (DXA120/ <br> S2, CD) | 1 |
| CF card (128 MB) | 1 |

*1 Mounting bracket: 2pcs
Support mounting bracket: 1pcs
Tail hold bracket: 1pcs
Tail hold bracket attachment screw (M4): 2pcs
The electronic manual (CD, part no. B8706ZZ) is available for purchase. Please contact your nearest YOKOGAWA dealer for details.

## ■ OPTIONAL ACCESSORIES

| Product | Model code <br> (part number) | Specification |
| :--- | :---: | :---: |
| Shunt resister (for screw input terminal) | 415920 | $250 \Omega \pm 0.1 \%$ |
|  | 415921 | $100 \Omega \pm 0.1 \%$ |
|  | 415922 | $10 \Omega \pm 0.1 \%$ |
| DX364LCD Assy for Replacement | DX36490 | - |
| CF card | 772093 | 512 MB |
|  | 772094 | 1 GB |
|  | 772095 | 2 GB |
| Mounting bracket | B8708FA | - |
| Support mounting bracket | B8708FH | - |
| Tail hold bracket | B8708FN | - |

## Basic Conditions and Individual Contracts at the Time of Purchase

The warranty for this product is defined in the basic conditions and individual contracts at the time of purchase.
The individual conditions are as follows.

- Validation

Yokogawa does not guarantee the final outcome of validation work even if there is a defect in the product.
For the warranty of validation services, please contact the company that performed the validation work.

- Warranty period of firmware

The firmware warranty period is one year.

## ■ DIMENSIONS

Note: If not specified, the tolerance is $\pm 3 \%$. However, for dimentions less than 10 mm , the tolerance is $\pm 0.3 \mathrm{~mm}$.

## Panel Cutout \& Spacing ( 2 to 26 panel thickness)

## Single-Unit Mounting

Side-by-Side Mounting

Note : If not specified, the tolerance is $\pm 3 \%$. However, for dimensions less than 10 mm , the tolerance is $\pm 0.3 \mathrm{~mm}$.

## Rear Terminal
