Model VJA1
Distributor
(Isolated Single-output and Isolated Dual-output Types) (with HART Communication: VJA1/H)

JUXTA

■ General

The VJA1 is a compact, plug-in type distributor that is used in combination with a two-wire type transmitter to convert the transmitter's 4 to 20 mA DC signals into isolated DC current or DC voltage signals.

- HART communication: VJA1/H (option code /H)
  Bi-directional relay of HART communication signals is possible while the field devices and the higher-level device are isolated from each other.
- Supports BARD-800.

Note 1: "/C0" option: Polyurethane coating. The "/C0" option does not guaranteed the coating effect though it is expected that the corrosion resistance for electric circuit is reinforced. And it is not able to submit coating test data.
Note 2: "/FB" option: The primary power supply fuse is deleted, short circuit and ship it.
