

Method of chemical substance survey

- format for submits/ information to be submitted-

■ YOKOGAWA group performs chemical substance surveys with chemSHERPA

- ◆ All products delivered to be used in Yokogawa products (including parts, material, subsidiary material, production material, instruction manual, and packaging material) will require for chemical substance information to be transferred (submits).
- ◆ Survey target substances are chemSHERPA declarable substances.

■ Format for submits/ information to be submitted

- ◆ Format for submits : chemSHERPA-AI(target products:articles)
 - Information to be submitted: required [general information]/[composition information]/[compliance assessment information]
 - In order to grasp the relevant residue, excluding evaporated substances, if of material/mixtures/coating etc., under data provision by chemSHERPA-AI, we request for entry of density (g/cm³,g/mm³) within the comment column of “product/ parts information”. If without an entry, we will require to contact you otherwise.

※chemSHERPA : Information transfer framework lead to organize by METI to share chemical substances information within products throughout the supply chain, of which is with the objective to promote transfer of information in an accurate and efficient manner.

Method of chemical substance survey

- format for submits/ information to be submitted-

◆ Precautions

- If of more than one product (parts, material) then to respond in 1 file for each product.

information on product/component(chemSHERPA-AI)

※chemSHERPA Data entry support tool for articles Ver.1.05.00a screen

Product/Component							
Product							
	Product name	Product number	Unit of mass	Product series name	Reporting unit	Remarks	Overall content flag
1	ABC123	Y12345	g		piece	0.003g/mm3	

Does not accept 1 chemSHERPA file for more than one product (parts, material)

Enter the density (g/cm³, g/mm³) within the comment column if of a material/ mixture/coating etc.

Method of chemical substance survey

- obtain and activate the data entry support tool -

■ Obtain and activate the chemSHERPA data entry support tool

◆ Obtain the tool

- Download the tool set from the chemSHERPA Web site

<https://chemsherpa.net/chemSHERPA/english/tool/>

Decompress the downloaded zip file (includes the operational manual and entry manual)

※Precautions: upon decompressing, do not change, move or delete the file/ folder structure or file name.

◆ Activate the tool (chemSHERPA-AI)

- To activate, double click  Article.exe located within the ARTICLE folder of the decompressed folder

The screenshot shows the chemSHERPA website interface. At the top, there is a navigation bar with six blue buttons: 'Latest information', 'About chemSHERPA for beginners', 'Data entry support tool', 'Documents', 'seminars', and 'Contact us, Help desk, FAQ'. Below this is a header section with the chemSHERPA logo, a 'Top page' link, and a 'Japanese' language selector. A secondary navigation bar contains seven items: 'Top page', 'Latest information', 'About chemSHERPA for beginners', 'Data entry support tool 数据制作支持 (工具等)', 'Documents 文件', 'Seminars 讲座', and 'Contact us, Help desk, FAQ'. The main content area begins with the heading 'What's chemSHERPA?' followed by a sub-heading 'A scheme that facilitates sharing information on chemical substances in products'. The text below explains that information handling between supply-chain partners is essential for appropriate management of chemical substances in products (CIP), and that chemSHERPA is a common scheme for information handling across a supply chain. It also states that the scheme is designed for steady and efficient information handling, applicable to various products and industries throughout a supply chain. The final line of text reads 'Toward a better information handling and chemical management in a supply chain'.

What's chemSHERPA?

A scheme that facilitates sharing information on chemical substances in products
Information handling between supply-chain partners is essential for appropriate management of chemical substances in products (CIP), in order to continuously respond to expanding regulations. The chemSHERPA can be used as a common scheme for information handling across a supply chain.

Designed for steady & efficient information handling
Applicable to various products and industries. Throughout a supply chain, from up- to down-stream, This scheme allows organizations to handle the CIP information under a shared policy.

Toward a better information handling and chemical management in a supply chain
