

# BAXENERGY

A Yokogawa Company

 **FARSIGHT**

## The Ultimate APM Platform for Renewable Energy Management

Bulletin 53T01D04-01EN

# Start for free in 10 minutes

Free to use -  
No need for a POC

01

Explore the full platform for free with instant access to core features - get up and running in minutes and upgrade when you're ready.

Fast Onboarding

02

Integrate your assets seamlessly in just minutes, without technical expertise required and avoiding complex configurations.

Unify all your assets under one roof

03

Streamline alarms, reports and key performance metrics from wind, solar and storage into a single dashboard—no more dozens of SCADA screens, just instant insight.

Scale On Demand

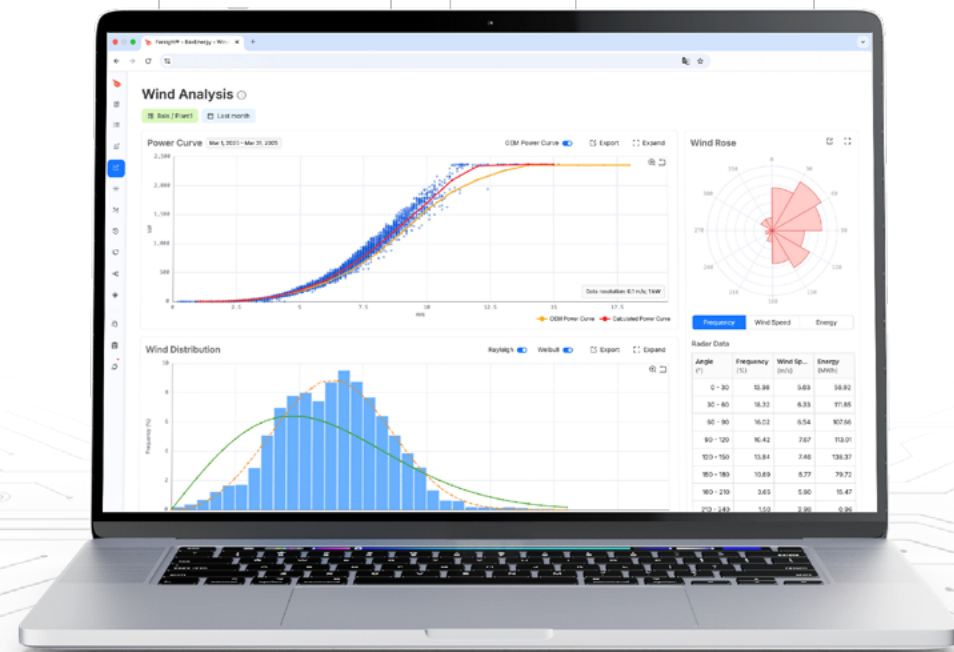

04

Scale at your own pace: begin with key sites and seamlessly add more assets, devices and third-party integrations as your portfolio grows.

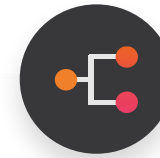

Enterprise-grade cybersecurity

05

Protect your facilities with cybersecure solutions, 24/7 threat detection and auto-enforced ISO 27001, NIS2 & NERC compliance, no downtime, no surprises.

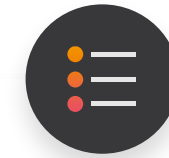

# Start Optimizing your Assets Today

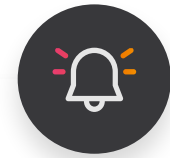

## Assets Onboarding

Quickly onboard your assets with automatic discovery, VPN integration and guided setups. Configure them with intuitive asset management tools.

## Real-Time Monitoring

Monitor your entire asset portfolio instantly, focusing on critical assets, alarms, and individual device health for immediate, informed decisions.

## Alarms Management

Manage real-time alarms with customizable filters, advanced acknowledgment features, multi-channel notifications, and expression-based alarm rules.

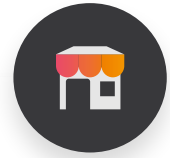

## Analytics and Performance

Gain deep insights through interactive time-series analysis, comprehensive solar and wind analytics, event and fault statistics, and detailed financial loss evaluation.

## Dashboard & Reporting

Create personalized dashboards with drag-and-drop simplicity, access detailed GIS maps, generate automatic and custom reports, and leverage predictive weather forecasting.

## Automation

Streamline operations with integrated marketplace, API integrations, dynamic asset grouping, advanced ticketing, and remote control capabilities.

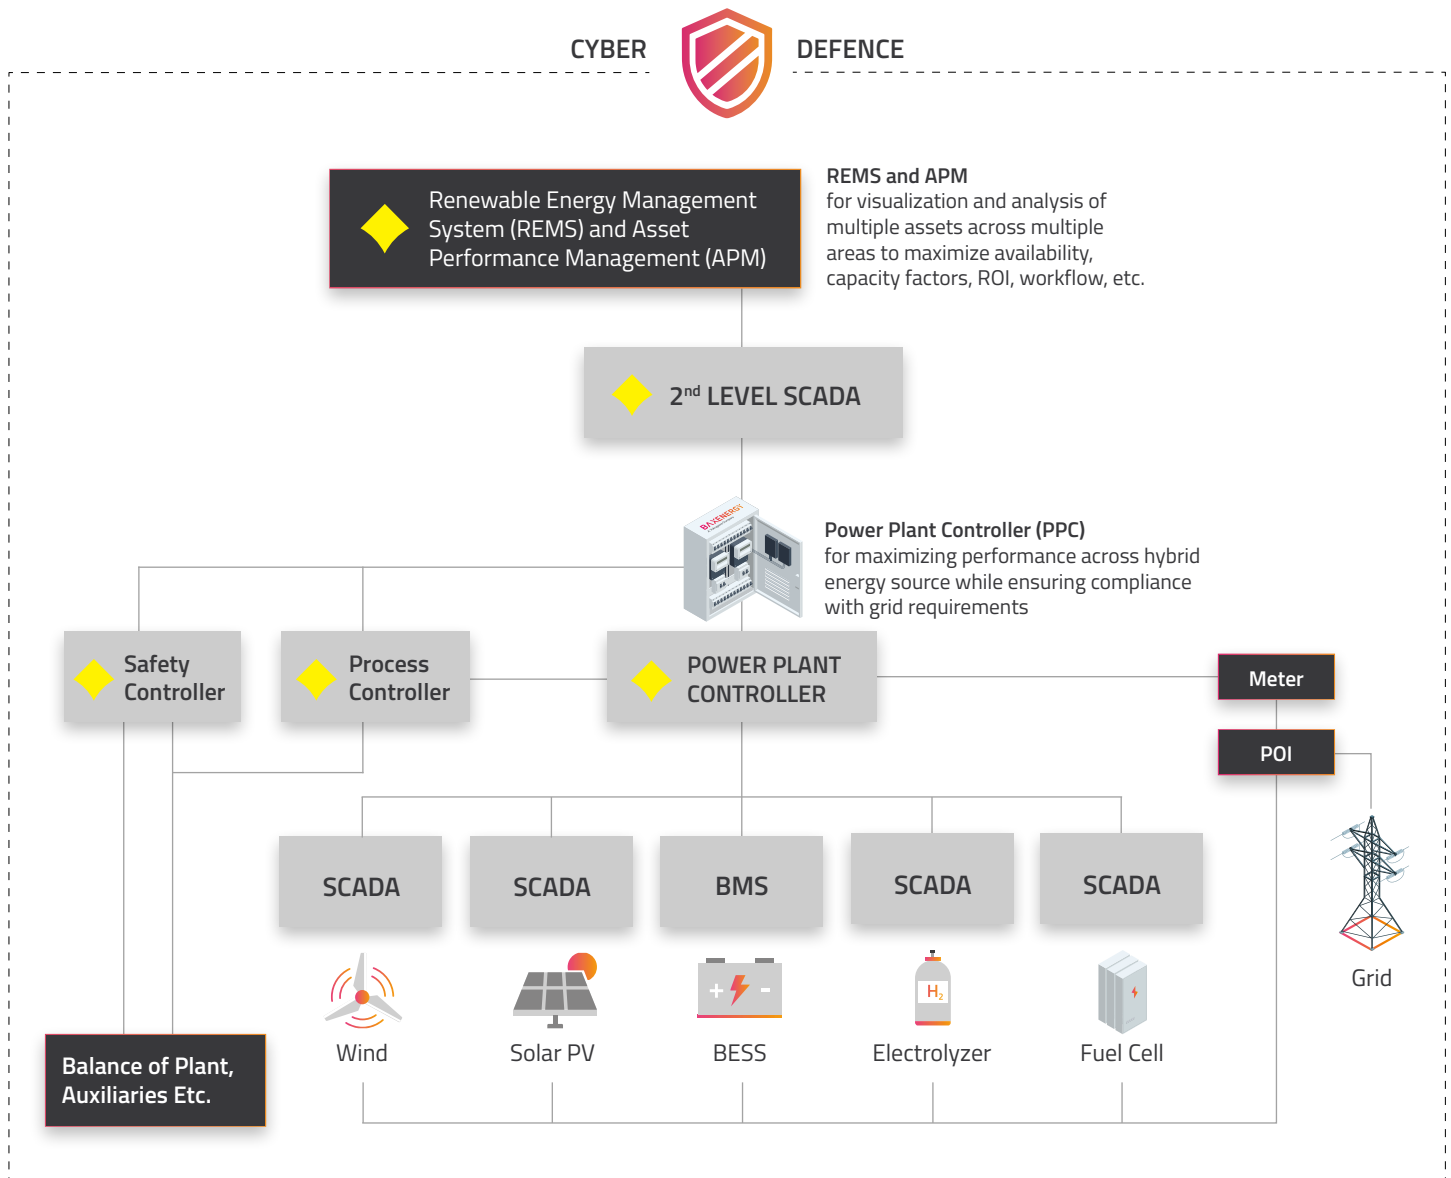

# Your trusted full-service partner for Renewable Energy Management

BaxEnergy, a Yokogawa company, is a global leader in Renewable Energy Management Solutions (REMS) specializing in Asset Performance Management (APM) systems, energy control, and data analytics.

BaxEnergy is the renewable arm of the Energy & Sustainability (E&S) Division of Yokogawa Electric, a global organization with a workforce of over 17,000+ employees operating in 56 countries. Yokogawa supports the operations of BaxEnergy anywhere our customers have their global assets.
