General Specifications

GS 01C25E02-01EN

EJX440A Gauge Pressure Transmitter

DP harp **EJ**

[Style: S2]

The high performance gauge pressure transmitter EJX440A features single crystal silicon resonant sensor and is suitable to measure liquid, gas, or steam pressure. The EJX440A outputs a 4 to 20 mA DC signal corresponding to the measured pressure. It also features quick response, remote setup and monitoring via BRAIN or HART communications, and diagnostics. The multi-sensing technology provides the advanced diagnostic function to detect such abnormalities as an impulse line blockage or heat trace breakage. FOUNDATION Fieldbus and PROFIBUS PA protocol types are also available.

All EJX series models in their standard configuration, with the exception of the Fieldbus and PROFIBUS types, are certified by TÜV as complying with SIL 2 for safety requirement.

STANDARD SPECIFICATIONS

Refer to GS 01C25T02-01EN for Fieldbus communication type and GS 01C25T04-01EN for PROFIBUS PA communication type for the items marked with " \Diamond ."

□ SPAN AND RANGE LIMITS

Measurement Span/Range		MPa	psi (/D1)	bar (/D3)	kg/cm ² (/D4)
	Span	0.25 to 32	36 to 4500	2.5 to 320	2.5 to 320
С	Range	-0.1 to 32	-14.5 to 4500	-1 to 320	-1 to 320
	Span	0.25 to 50	36 to 7200	2.5 to 500	2.5 to 500
D	Range	-0.1 to 50	-14.5 to 7200	-1 to 500	-1 to 500

PERFORMANCE SPECIFICATIONS

Zero-based calibrated span, linear output, wetted parts material code 'S' and silicone oil, unless otherwise mentioned.

For Fieldbus and PROFIBUS PA communication types, use calibrated range instead of span in the following specifications.

Specification Conformance

EJX series ensures specification conformance to at least $\pm 3\sigma$.

Reference Accuracy of Calibrated Span

(includes the effects of terminal-based linearity, hysteresis, and repeatability)

Measurement span		С
Reference	X ≤ span	±0.04% of Span
accuracy	X > span	±(0.005+0.0055 URL/span)% of Span
X		5 MPa (720 psi)
UR (upper rar		32 MPa (4500 psi)

Measurement span		D
Reference	X ≤ span	±0.04% of Span
accuracy	X > span	±(0.005+0.0035 URL/span)% of Span
Х		5 MPa (720 psi)
LIDI		50 MPa (7200 psi)

Ambient Temperature Effects per 28°C (50°F) Change

Capsule	Effect	
С	±(0.04% Span + 0.0141% URL)	
D	±(0.04% Span + 0.009% URL)	

Stability (All normal operating condition) ±0.1% of URL per 15 years

Power Supply Effects(Output signal code D and E) ±0.005 % per Volt (from 21.6 to 32 V DC, 350Ω)

Vibration Effects

Amplifier housing code 1 and 3: Less than 0.1% of URL when tested per the requirements of IEC60770-1 field or pipeline with high vibration level (10-60 Hz, 0.21 mm displacement/60-2000 Hz 3 g) Amplifier housing code 2:

Less than ±0.1% of URL when tested per the requirements of IEC60770-1 field with general application or pipeline with low vibration level (10-60 Hz 0.15mm displacement /60-500 Hz 2g)

Mounting Position Effects

Rotation in diaphragm plane has no effect. Tilting up to 90 degree will cause zero shift up to 0.4 kPa (1.6 inH₂O) which can be corrected by the zero adjustment.

Response Time (All capsules) "◊"

90 ms

When software damping is set to zero and including dead time of 45 ms (nominal)

FUNCTIONAL SPECIFICATIONS

Output "◊"

Two wire 4 to 20 mA DC output with digital communications, linear or square root programmable. BRAIN or HART FSK protocol are superimposed on the 4 to 20 mA signal. Output range: 3.6 mA to 21.6 mA

Output limits conforming to NAMUR NE43 can be pre-set by option code C2 or C3.

Failure Alarm (Output signal code D, E and J)

Output status at CPU failure and hardware error; Up-scale: 110%, 21.6 mA DC or more (standard) Down-scale: -5%, 3.2 mA DC or less

Analog output status at process abnormality (Option code /DG6);

The result of process abnormality detected by the advanced diagnostic function can be reflected to an analog alert status. The following three setting modes are available.

			Mode	
		Burnout	Fall back	Off
Standa	rd	110%, 21.6mA or more	Holds to a	
	/C1	-2.5%, 3.6mA or less	specified value within the	Normal output
Option Code	Code 702 3.8mA or less 103.1%,	output range from 3.6mA to	Normai output	
		103.1%, 20.5mA or more	21.6mA	

Damping Time Constant (1st order)

Amplifier's damping time constant is adjustable from 0.00 to 100.00 s by software and added to response time.

Note: For BRAIN protocol type, when the software damping is set to less than 0.5 s, communication may occasionally be unavailble during the operation, especially while output changes dynamically. The default setting of damping ensures stable communication. Update Period "◊" Pressure: 45 ms

Zero Adjustment Limits

Zero can be fully elevated or suppressed, within the lower and upper range limits of the capsule.

External Zero Adjustment

External zero is continuously adjustable with 0.01% incremental resolution of span. Re-range can be done locally using the digital indicator with rangesetting switch.

Integral Indicator (LCD display) "0"

5-digit numerical display, 6-digit unit display and bar graph.

The indicator is configurable to display one or up to three of the following variables periodically.; pressure in %, scaled pressure, measured pressure. See also "Factory Setting".

Local Parameter Setting (Output signal code D, E, and J)

Parameter configuration by the external zero adjustment screw and push button (Integral indicator code E) offers easy and quick setup for parameters of Tag number, Unit, LRV, URV, Damping, Output mode (linear/square root), Display out 1, and Re-range by applying actual pressure (LRV/URV).

Burst Pressure Limits

132 MPa (19100 psi)

Self Diagnostics

CPU failure, hardware failure, configuration error, and over-range error for pressure and capsule temperature.

User-configurable process high/low alarm for pressure is also available, and its status can be output when optional status output is specified.

Advanced Diagnostics (optional) "0"

Applicable for Output signal code E, J and F. • Impulse line blockage detection

The impulse line condition can be calculated and detected by extracting the fluctuation component from the static pressure signal.

Heat trace monitoring The change of the flange temperature calculated by using the two temperature sensors built in the EJX enables to detect the heat trace breakage or the abnormal temperature due to the failure.

Signal Characterizer (Output signal code D, E and J)

User-configurable 10-segment signal characterizer for 4 to 20 mA output.

Status Output (optional, output signal code D, E and J)

One transistor contact output (sink type) to output the status of user configurable high/low alarm for pressure.

Contact rating : 30 V DC, 120 mA DC max. Refer to 'Terminal Configuration' and 'Wiring Example for Analog Output and Status Output.'

SIL Certification

All the EJX series transmitters except Fieldbus and PROFIBUS PA communication types are certified by TÜV in compliance with the following standards; IEC 61508: 2010; Part1 to Part 7 Functional Safety of Electrical/electronic/ programmable electronic related systems; SIL 2 capability for single transmitter use, SIL 3 capability for dual transmitter use.

NORMAL OPERATING CONDITION (Optional features or approval codes may affect limits.)

Ambient Temperature Limits

−40 to 85°C (−40 to 185°F) −30 to 80°C (−22 to 176°F) with LCD display

Process Temperature Limits -40 to 120°C (-40 to 248°F)

Ambient Humidity Limits

0 to 100% RH

Maximum Over Pressure

Capsule	Pressure	
С	48 MPa (6750 psi)	_
D	75 MPa (10800 psi)	

Working Pressure Limits (Silicone oil) Maximum Pressure Limits

Capsule	Pressure
С	32 MPa (4500 psi)
D	50 MPa (7200 psi)

Minimum Pressure Limit See graph below

Supply & Load Requirements (Output signal code D, E and J. Optional

features or approval codes may affect electrical requirements.)

With 24 V DC supply, up to a 550 Ω load can be used. See graph below.

Figure 2. Relationship Between Power Supply Voltage and External Load Resistance

Supply Voltage "0"

- 10.5 to 42 V DC for general use and flameproof type. 10.5 to 32 V DC for lightning protector
- (option code /A.) 10.5 to 30 V DC for intrinsically safe, ty
- 10.5 to 30 V DC for intrinsically safe, type n, or nonincendive type.

Minimum voltage limited at 16.6 V DC for digital communications, BRAIN and HART

Load (Output signal code D, E and J) 0 to 1290 Ω for operation

250 to 600Ω for digital communication

Communication Requirements "0"

(Approval codes may affect electrical requirements.) BRAIN

Communication Distance

Up to 2 km (1.25 miles) when using CEV polyethylene-insulated PVC-sheathed cables. Communication distance varies depending on type of cable used.

Load Capacitance

0.22 µF or less

Load Inductance

3.3 mH or less

Input Impedance of communicating device 10 k Ω or more at 2.4 kHz.

EMC Conformity Standards

EN 61326-1 Class A, Table2 EN 61326-2-3 EN 61326-2-5 (for fieldbus) 3

European Pressure Equipment Directive 2014/68/EU

Sound Engineering Practice

With option code /PE3

CE0038

Category III, Module H, Type of Equipment: Pressure Accessory-Vessel, Type of Fluid: Liquid and Gas, Group of Fluid: 1 and 2

EU RoHS Directive

EN 50581

Safety Requirement Standards

- EN 61010-1, C22.2 No.61010-1
- Installation category: I
- (Anticipated transient overvoltage 330 V) Pollution degree: 2
- Indoor/Outdoor use

PHYSICAL SPECIFICATIONS

Wetted Parts Materials

Diaphragm, cover flange, process connector, capsule gasket, and vent/drain plug Refer to "MODEL AND SUFFIX CODES."

Process connector gasket/O-ring

Fluorinated rubber (o-ring) for C capsule Glass reinforced Teflon (gasket) for D capsule

Non-wetted Parts Materials

Boltina

B7 carbon steel, 316L SST or 660 SST Housing

- Low copper cast aluminum alloy
- Low copper cast aluminum alloy with corrosion resistance properties (copper content $\leq 0.03\%$, iron content $\leq 0.15\%$) (optional)
- ASTM CF-8M Stainless steel (optional)

Coating of housing

[for aluminum housing] Urethane curing type polyester resin powder coating Mint-green paint (Munsell 5.6BG 3.3/2.9 or its equivalent) [for option code /P or /X2] Epoxy and polyurethane resin solvent coating

Degrees of protection

IP66/IP67, Type 4X

Cover O-rings

Buna-N, fluoro-rubber (optional)

Name plate and tag 316 SST

Fill fluid

Silicone, Fluorinated oil (optional)

Weight

[Installation code 7, 8 and 9] 4.9 kg(10.8 lb) without integral indicator, mounting bracket, and process connector. Add 1.5 kg (3.3lb) for Amplifier housing code 2.

Connections

Refer to "MODEL AND SUFFIX CODES." Process Connection of Cover Flange: IEC61518 (for C capsule)

Mounting bracket B J K N		304 SST or SCS13A 2-inch pipe mounting, L type (for vertical piping) 316 SST 2-inch pipe mounting, flat type (for horizontal piping) 316 SST 0r SCS14A 2-inch pipe mounting, L type (for vertical piping)
Optional Codes		□/ Optional specification

The "▶" marks indicate the most typical selection for each specification.

 *1: A Users must consider the characteristics of selected wetted parts material and influence of process fluids. Specifying inappropriate materials has the potential to cause serious damage to human body and plant facilities resulted from an unexpected leak of the corrosive process fluids.

*2: *3: Lower limit of ambient and process temperature is -15°C for capsule code C.

Specify the process connections code 3 or 4, when using the process connector for D capsule. Without the process connector, use the 1/4 NPT male piping to directly connect to the cover flange. Not applicable for electrical connection code 0, 5, 7, 9 and A.

*4: *5:

Not applicable for electrical connection code 0, 5, 7 and 9.

*6: Material of a blind plug; aluminum alloy for code 5 and 9, and SUS304 for code 7.

*7: Not applicable for output signal code G.

*8: Not applicable for output signal code F.

Table. Wetted Parts Materials

Wetted parts material code	Cover flange	Process connector	Capsule	Capsule gasket	Vent/Drain plug
S #	F316 SST	ASTM CF-8M ^{*1} (C-capsule) 316 SST (D-capsule)	Hastelloy C-276 *2 (Diaphragm) F316L SST, 316L SST (Others)	Teflon-coated 316L SST	316 SST

Cast version of 316 SST. Equivalent to SCS14A. Hastelloy C-276 or ASTM N10276. *1: *2:

The '#'marks indicate the construction materials conform to NACE material recommendations per MR0175/ISO 15156. Please refer to the latest standards for details. Selected materials also conform to NACE MR0103.

Pressure tes		Test Pressure: 32 MPa (4500 ps	,		Nitrogen(N2) Gas or Water*21	T09
Leak test ce	rtificate ^{ng}	Test Pressure: 50 MPa (7200 ps	si) ^{*20}		Retention time: one minute	T08

- Not applicable with color change option. Not applicable for amplifier housing code 2. *1·
- *2: When this option code is specified, check terminals are not available. Not applicable for output signal code F and G.
- *3: Applicable for wetted parts material code S.
- *4: The unit of MWP (Max. working pressure) on the name plate of a housing is the same unit as specified by option codes D1, D3, and D4.
- *5:
- Applicable for vertical impulse piping type (installation code 3 or 7) and wetted parts material code S. Applicable for output signal codes D, E and J. The hardware error indicates faulty amplifier or capsule. *6:
- *7: Applicable for wetted parts material code S; process connection codes 3, 4, and 5; installation code 9; and mounting bracket code N. Process connection faces on the other side of zero adjustment screw.
- Not applicable for capsule code D. *8:
- Also see 'Ordering Information'. *9:
- *10: Not applicable for amplifier housing code 2 and 3.
- *11: 316 or 316L SST. The specification is included in amplifier code 2.
- Applicable for wetted parts material code 5; process connection code 5; and installation code 8 and 9. Not applicable for option code U1, N2, N3 and M11. No PTFE is used for wetted parts. *12:
- Applicable only for output signal code E and J.
- *13: *14: The change of pressure fluctuation is monitored and then detects the impulse line blockage. See TI 01C25A31-01E for detailed technical information required for using this function.
- *15: If compliance with category III is needed, specify this option code.
- *16: Material traceability certification, per EN 10204 3.1B.
- Applicable for process connections code 5. *17:
- *18: Applicable for process connections code 3, and 4.
- *19: The unit on the certificate is always Pa unit regardless of selection of option code D1, D3 or D4.
- *20: Not applicable for capsule code C.
- *21: Pure nitrogen gas or pure water is used for oil-prohibited use (option codes K1, K2, K5, and K6).
- *22: /A2 is not applicable with FM approval.

DIMENSIONS

Unit: mm (approx.inch)

 Horizontal Impulse Piping Type (INSTALLATION CODE '9') (For CODE '8', refer to the notes below.)

*1: When Installation code '3' or '8' is selected, high and low pressure side on above figure are reversed. (i.e. High pressure side is on the right side.)

- *2: When option code K1, K2, K5 or K6 is specified, add 15mm(0.59inch) to the value in the figure.
- *3: Not available when option code GS is selected.
- *4: 87(3.43) for D capsule.
- *5: 157(6.18) for D capsule.
- *6: When electrical connection code 7 or C is selected, a blind plug is protruded up to 8 mm from the conduit connection.

Unit: mm (approx.inch)

• Universal Flange (INSTALLATION CODE 'U')

- *1: When Option code K1, K2, K5, or K6 is selected, add 15 mm(0.59 inch) to the value.
- *2: 87(3.43) for D capsule.
- *3: 157(6.18) for D capsule.
- *4: When electrical connection code 7 or C is selected, a blind plug is protruded upto 8 mm from the conduit connection.

Terminal Wiring

SUPPLY	+ -	$\begin{bmatrix} 1\\ 2 \end{bmatrix}$ Power supply and output terminals	
CHECK	+ -	$\begin{bmatrix} 3 \\ 2 \end{bmatrix}$ External indicator (ammeter) terminals ^{*1*2} or	
or ALARM	+	③ ☐ Status contact output terminals [•] ² (when /AL is specified)	
Ground terminal			

*1: When using an external indicator or check meter, the internal resistance must be 10 Ω or less. A check meter or indicator cannot be connected when /AL option is specified.

*2: Not available for FOUNDATION Fieldbus and PROFIBUS PA communication types.

• Wiring Example for Analog Output and Status Output

< Ordering Information > "\o" Specify the following when ordering

For output signal code –J, refer to GS 01C25T01-01EN.

- 1. Model, suffix codes, and option codes
- 2. Calibration range and units
 - Calibration range can be specified with range value specifications up to 5 digits (excluding any decimal point) for low or high range limits within the range of -32000 to 32000. When reverse range is designated, specify Lower Range Value(LRV) as greater than Upper Range Value(URV.)
 - 2) Specify only one unit from the table, 'Factory Settings' when shipped.'
- 3. Display scale and units (for transmitters equipped with integral indicator only) Specify either 0 to 100 % or engineering unit scale and 'Range and Unit' for engineering units scale: Scale range can be specified with range limit specifications up to 5 digits (excluding any decimal point) for low or high range limits within the range of -32000 to 32000. The unit display consists of 6-digit, therefore, if the specified unit is longer than 7 characters excluding '/', the first 6 characters will be displayed on the unit display.
- Tag Number (if required) Specified characters (up to 16 characters for BRAIN, 22 characters for HART, or 16 characters for /N4 tag) are engraved on the stainless steel tag plate fixed on the housing.
- SOFTWARE TAG (for HART only. If required) Specified characters (up to 32 characters) are set as "Tag" (the first 8 characters) and "Long tag"*1 (32 characters) in the amplifier memory. Use alphanumeric capital letters. When the "SOFTWARE TAG" is not specified, specified "TAG NO" is set as "Tag" (the first 8 characters) and "Long tag"*1 (22 characters) in the amplifier memory. *1: applicable only when HART 7 is selected.
- 6. Other factory configurations (if required) Specifying option code CA or CB will allow further configuration at factory. Following are configurable items and setting range. [/CA : For HART communication type]
 1) Descriptor (up to 16 characters)
 2) Message (up to 30 characters)
 3) Software damping in second (0.00 to 100.00)
 - [/CB : For BRAIN communication type]
 - 1) Software damping in second (0.00 to 100.00)
- All Rights Reserved. Copyright o 2005, Yokogawa Electric Corporation Subject to change without notice.

< Factory Setting > "0"

Tag number	As specified in order	
Software damping *1	'2.00 s' or as specified in order	
Calibration range lower range value	As specified in order	
Calibration range upper range value	As specified in order	
Calibration range units	Selected from mmH ₂ O, mmH ₂ O(68°F), mmAq ^{*2} , mmWG ^{*2} , mmHg, Pa, hPa ^{*2} , kPa, MPa, mbar, bar, gf/cm ² , kgf/cm ² , inH ₂ O, inH ₂ O(68°F), inHg, ftH ₂ O, ftH ₂ O(68°F) or psi. (Only one unit can be specified)	
Display setting	Designated value specified in order. (%, or user scaled value.)	

*1: To specify this item at factory, option code CA or CB is required.

*2: Not available for HART protocol type.
