UT35A/RSP, UT32A/RSP
Digital Indicating Controller
(with Non-isolated Remote Input)

UTAdvanced™

Functional Enhancement

Overview

The UT35A/RSP and UT32A/RSP are single-loop controller with a non-isolated remote input. Digital indicating controllers employ an easy-to-read, 14-segment large color LCD display, along with navigation keys, thus greatly increasing the monitoring and operating capabilities. A ladder sequence function is included as standard. The short depth of the controller helps save instrument panel space. The UT35A and UT32A also support open networks such as Ethernet communication.

Features

- Equipped with non-isolated remote input (not isolated from PV input). Can be used for remote setpoint setting, external compensating input, auxiliary input for computation, and the like.
- A 14-segment, active (PV display color changing function) color LCD display is employed. Two five-digit, high-resolution displays are possible. Alphabet letters can be displayed in an easy-to-read manner. The guide display shows parameter names.
- Easy to operate
Navigation keys (SET/ENTER and Up/Down/Left/Right arrow keys) are employed to facilitate making settings.
- 65 mm depth
The small depth enables the mounting in a thin and small instrumented panel.
- Ladder sequence function is included as standard. This function allows for creating a simple sequence control. Dedicated LL50A Parameter Setting Software (sold separately) allows for performing programming using a ladder language.
- Various built-in open network functions such as Ethernet are available.
Easy connection with various vendors' PLCs is possible. (UT32A support CC-Link and RS485 communication only.)
- Quick setting function
Setting only the minimum necessary parameters for operation is possible.
- Equipped with a multitude of functions
Universal I/O and retransmission output are included as standard. PID control, heating/cooling control, etc. are available.
- LL50A Parameter Setting Software (sold separately)
The parameters and ladder programs of UTAdvanced digital indicating controller can be built from a PC using this software. It makes data management even easier.
- Dust-proof and drip-proof
IP66 (for front panel) (Not applicable to side-by-side close mounting.)
NEMA4 (Hose-down test only)
