Overview
The UT35A/RSP and UT32A/RSP are single-loop controller with a non-isolated remote input. Digital indicating controllers employ an easy-to-read, 14-segment large color LCD display, along with navigation keys, thus greatly increasing the monitoring and operating capabilities. A ladder sequence function is included as standard. The short depth of the controller helps save instrument panel space. The UT35A and UT32A also support open networks such as Ethernet communication.

Features
- Equipped with non-isolated remote input (not isolated from PV input). Can be used for remote setpoint setting, external compensating input, auxiliary input for computation, and the like.
- A 14-segment, active (PV display color changing function) color LCD display is employed. Two five-digit, high-resolution displays are possible. Alphabet letters can be displayed in an easy-to-read manner. The guide display shows parameter names.
- Easy to operate
  Navigation keys (SET/ENTER and Up/Down/Left/Right arrow keys) are employed to facilitate making settings.
- 65 mm depth
  The small depth enables the mounting in a thin and small instrumented panel.
- Ladder sequence function is included as standard.
  This function allows for creating a simple sequence control. Dedicated LL50A Parameter Setting Software (sold separately) allows for performing programming using a ladder language.
- Various built-in open network functions such as Ethernet are available.
  Easy connection with various vendors’ PLCs is possible. (UT32A support CC-Link and RS485 communication only.)
- Quick setting function
  Setting only the minimum necessary parameters for operation is possible.
- Equipped with a multitude of functions
  Universal I/O and retransmission output are included as standard. PID control, heating/cooling control, etc. are available.
- LL50A Parameter Setting Software (sold separately)
  The parameters and ladder programs of UTAdvanced digital indicating controller can be built from a PC using this software. It makes data management even easier.
- Dust-proof and drip-proof
  IP66 (for front panel) (Not applicable to side-by-side close mounting.)
  NEMA4 (Hose-down test only)

Functional Specifications
Control Specifications
(1) Control Mode
  Single-loop control
(2) Control period
  200 ms

*1: Excluding control output
*2: In the case cooling control output is analog output, it cannot be used for transmission output.
*3: Excluding control output relays

Control Computation Function
(1) Types of control
  - PID control
  - ON/OFF control (*4)
  - Two-position two-level control (*5)
  - Heating and cooling control (*5)

*4: Not selectable for Position proportional type
*5: Selectable for heating and cooling control
(2) Control Computation Function
(a) Target setting point and the number of PID parameter groups
Respectively, four sets of target setpoints, alarm setpoints, and PID parameters can be set.
(b) Selecting the PID parameter group
The following PID parameter groups can be selected.
• Target setpoint number (SPNO) (The PID number can be set arbitrarily.)
• Measured input zone PID
• Target setpoint zone PID
• Reached target setpoint zone PID
(c) Auto-tuning
• Tuning results can be selected from two options, Normal or Stable.
• Tuning output limit can be set. (It cannot be used in heating/cooling control.)
(d) "Super" function: Overshoot-suppressing function
(e) "Super 2" function: Hunting-suppressing function
(f) STOP preset output function
(g) Input ERROR preset output function
(h) MANUAL preset output function

(3) Operation Mode Switching

Alarm Functions

- Types of Alarm
  - Measured value alarm
  - PV (measured value) high/low limit alarm
  - Deviation high/low limit alarm
  - Deviation high and low limits alarm
  - Deviation within high and low limits alarm
  - Analog input PV high/low limit alarm
  - Feedback input high/low limit alarm
  - PV rate-of-change alarm
  - Deviation alarm
  - Deviation high/low limit alarm
  - Deviation high and low limits alarm
  - Deviation within high and low limits alarm
  - Rate-of-change alarm
  - SP (setpoint) high/low limit alarm
  - Target SP high/low limit alarm
  - Target SP deviation high/low limit alarm
  - Target SP deviation high and low limits alarm
  - Target SP deviation within high and low limits alarm
  - Setpoint alarm
  - Control output high/low limit alarm
  - Cooling control output high/low limit alarm
  - Output alarm
  - Heater disconnection alarm (for /HA option)
  - Self-diagnosis alarm
  - FAIL

- Alarm Functions
  - Alarm output action: Alarm stand-by action
  - Alarm latch (forced reset) function
  - Alarm hysteresis
  - Alarm ON/OFF delay timer

<table>

</tr>
<tr>
<td>K register (constant) 30</td>
<td></td>
</tr>
<tr>
<td>Special device</td>
<td>Special relay (bit data) 12</td>
</tr>
</tbody>
</table>

* Process data and process relay can be used besides the above-mentioned.

(4) Program capacity
Max Program capacity: 300 steps *

* Available number of steps differs according to the parameters and using command.

(5) Ladder computation period
Ladder computation period is the same as control period.

## Hardware Specifications

### Display Specifications

- **PV display**
  5-digit, 14-segment active color LCD (white/red)
  Character height: 21.5 mm for UT35A and 13.0 mm for UT32A

- **Data display**
  5-digit, 11-segment color LCD (orange)

- **Bar graph display**
  12-segment color LCD (orange)

### Universal Input Specifications

- **Number of input points:** 1
- **Types of input, instrument range, and measurement accuracy (see the table below)**

### Types of Input

<table>

<td></td>
</tr>
</tbody>
</table>

*The accuracy is that in the standard operating conditions: 23 ±2°C, 55 ±10%RH, and power frequency at 50/60 Hz.*

1. ±0.3°C and ±1 digit in the range between 0 and 100°C
2. ±0.5°C ±1 digit in the range between -100 and 200°C

- **Applicable standards:** JIS, IEC and DIN (ITS-90) for thermocouples and resistance-temperature detectors (RTD)
- **Input sampling period:** Synchronized to control period
- **Burnout detection**
  Upscale and downscale of function, and OFF can be specified for the standard signal of thermocouple and resistance-temperature detector (RTD).
  For integrated signal input, 0.1 V or less is judged as a burnout.
  - **Input bias current:** 0.05 μA (for thermocouple and resistance-temperature detector (RTD))
  - **Resistance-temperature detector (RTD) measured current:** About 0.16 mA
  - **Input resistance**
    1 MΩ or more for thermocouple/mV input
    About 1 MΩ for voltage input
    About 250 Ω for current input (with built-in shunt resistance)
  - **Allowable signal source resistance**
    250 Ω or less for thermocouple/mV input
    Effect of signal source resistance: 0.1 μV/Ω or less
    2 kΩ or less for DC voltage input
    Effect of signal source resistance: about 0.01%/100 Ω
  - **Allowable wiring resistance**
    Up to 150 Ω per line for resistance-temperature detector (RTD) input (conductor resistance between the three lines shall be equal)
    Effect of wiring resistance: ±0.1°C/10 Ω
  - **Allowable input voltage/current**
    ±10 V DC for thermocouple/mV/mA or resistance-temperature detector (RTD) input
    ±20 V DC for V input
  - **Noise reduction ratio**
    40 dB or more (at 50/60 Hz) in normal mode
    120 dB or more (at 50/60 Hz) in common mode
  - **Reference junction compensation error**
    ±1.0°C (15 to 35°C)
    ±1.5°C (-10 to 5°C and 35 to 50°C)

### Remote Input with Direct Input Specifications (Non-isolated)

- **This function can be used for remote setpoint setting, external compensating input, auxiliary input for computation, etc.**
- **Number of input points:** 1 point
- **For types of input, instrument range, and measurement accuracy, see the table below.**

<table>
<thead>
<tr>
<th>Types of input</th>
<th>Instrument range</th>
<th>Accuracy</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Integrated signal</strong></td>
<td>0.400 to 2.000 V</td>
<td>±0.2% of instrument range ±1 digit</td>
</tr>
<tr>
<td></td>
<td>1.000 to 5.000 V</td>
<td>±0.1% of instrument range ±1 digit</td>
</tr>
<tr>
<td><strong>DC voltage</strong></td>
<td>0.000 to 2.000 V</td>
<td>±0.2% of instrument range ±1 digit</td>
</tr>
<tr>
<td></td>
<td>0.00 to 10.0 V</td>
<td>±0.1% of instrument range ±1 digit</td>
</tr>
</tbody>
</table>

- **Input sampling period:** Synchronized to control period
- **Input resistance:** About 1 MΩ
- **Burnout detection:** Functions at standard signal
  Burnout is determined to have occurred if it is 0.1 V or less.
Contact Input Specifications

- Number of points: 2 points (standard)
  For the maximum number of points, see the model and suffix code table.
- Input type: no-voltage contact input or transistor contact input
- Input contact capacity: 12 V DC, 10 mA or more
  Be sure to use a contact with a minimum ON current of 1 mA or less
- ON/OFF detection
  For no-voltage contact input:
  - Contact resistance 1 kΩ or less in ON state
  - Contact resistance 50 kΩ or more in OFF state
  Transistor contact input:
  - 2 V or less in ON state
  - Leak current 100 μA or less in OFF state
- Status detection minimum hold time: control period + 50 ms
- Application: SP switching, operation mode switching, event input

Analog Output Specifications

- Number of points
  Control output (heating-side output): 1 point (standard), which is shared with transmission output
  Cooling-side output: 1 point, which is shared with transmission output
- Output functions
  Current output or voltage pulse output
- Current output
  4 to 20 mA DC or 0 to 20 mA DC/load resistance 600 Ω or less
- Current output accuracy
  ±0.1% of span (however, ±5% of span for 1 mA or less)
  The accuracy is that in the standard operating conditions: 23 ±2°C, 55 ±10%RH, and power frequency 50/60 Hz
- Voltage pulse output
  Application: time proportional output
  ON voltage: 12 V or more/load resistance of 600 Ω or more
  OFF voltage: 0.1 V DC or less
  Time resolution: 10 ms or 0.1% of output value, whichever is larger

Retransmission Output Specifications

- Number of points: 1 point (standard), which is shared with 15V DC loop power supply
  Additional 1 points when analog control output are not used
- Output function: current output
  4 to 20 mA DC or 0 to 20 mA DC/load resistance 600 Ω or less
- Current output accuracy (conversion accuracy from PV display on the set scale): ±0.1% of span (however, ±5% of span for 1 mA or less)
  The accuracy is that in the basic operating conditions: 23 ±2°C, 55 ±10%RH, and power frequency 50/60 Hz
  This is not conversion accuracy through input and output but the performance of transmission output itself.

15V DC Loop Power Supply Specifications

- Number of points: 1 point (standard), which is shared with retransmission output
  Control output (1 point) can also be used.
- Supply voltage: 14.5 to 18.0 V DC
- Maximum supply current: about 21 mA (with short-circuit current limiting circuit)

Step Response Time Specifications

Within 1 s
(Response time at 63% of transmission output when a change is made stepwise in the range between 10 and 90% of input span)

Relay Contact Output Specifications

- Types of contact and number of points
  Control relay output: one 1c-contact point
  Control output of heating and cooling control: 2 1a-contact points
  Alarm output: 3 1a-contact points (Common is separated)
- Contact rating
  1c-contact: 3 A at 250 V AC or 3 A at 30 V DC (resistance load)
  1a-contact: For alarm output: 1 A at 240 V AC or 1 A at 30 V DC (resistance load)
  For output of heating and cooling control relay output: 3 A at 240 V AC or 3 A at 30 V DC (resistance load)
  The control output should always be used with a load of 10 mA or more.
  The alarm output should always be used with a load of 1 mA or more.
- Application: time proportional output, alarm output, FAIL output, etc.
- Time resolution for control output: 10 ms or 0.1% of output value, whichever is larger

Transistor Contact Output Specifications

- Number of points: see the model and suffix code table
- Output form: open collector (sink current)
- Output contact capacity: Up to 24 V DC, 50 mA
- Output time resolution: min 200 ms
- Application: alarm output, FAIL output, etc.

Position Proportional Output Specifications

- Position signal input
  Slide resistance: 100 Ω to 2.5 kΩ of total resistance
  100% side and slide line: with disconnection detection
  0% side: without disconnection detection
  Current input: 4 to 20 mA DC (with disconnection detection)
  Input resistance: about 330 Ω
- Sampling period: 50 ms
- Measurement resolution: 0.1% of input span
- Position proportional relay output
  UT35A: Two 1a-contact points , 3 A at 250 V AC or 3 A at 30 V DC (resistance load)
  UT32A: Two 1a-contact points , 3 A at 240 V AC or 3 A at 30 V DC (resistance load)
  This should always be used with a load of 10 mA or more.
Heater Break Alarm Specifications (for /HA Option)

- Function: Measures the heater current using an external current transformer (CT) and generates a heater break alarm when the measured value is less than the disconnection detection value.
- Number of input points: 2 points
- Number of output points: 2 points (transistor contract output)
- CT input range: 0.0 to 0.1 Arms (0.12 Arms or more cannot be applied)
- Heater current alarm setting range: OFF, 0.1 to 300.0 Arms
- Heater current measured value display range: 0.0 to 360.0 Arms
  * The CT ratio can be set. CT ratio setting range: 1 to 3300
- Recommended CT: CT from URD Co. Ltd.
  CTL-6-S-H: CT ratio 800, measurable current range: 0.1 to 80.0 Arms
  CTL-12L-30: CT ratio 3000, measurable current range: 0.1 to 180.0 Arms
- Heater current measurement period: 200 ms
- Heater current measurement accuracy: ±5% of CT input range span ±1 digit (CT error is not included)
- Heater current detection resolution: Within 1/250 of CT input range span
- Disconnection detection ON time: Minimum 200 ms.
  (for time proportional output)

24 V DC Loop Power Supply Specifications (for /LP Option)

- Application: Power is supplied to the 2-wire transmitter.
- Supply voltage: 21.6 to 28.0 V DC
- Rated current: 4 to 20 mA DC
- Maximum supply current: About 30 mA (with short-circuit current limiting circuit)

Safety and EMC Standards

- Safety:
  Compliant with IEC/EN 61010-1 (CE), IEC/EN 61010-2-201 (CE), IEC/EN 61010-2-300 (CE), approved by CAN/CSA C22.2 No. 61010-1 (CSA), approved by UL 61010-1.
  Installation category: II
  Pollution degree: 2
  Measurement category: I (CAT I) (UL, CSA)
  O (Other) (CE)
  Rated measurement input voltage: Max. 10 V DC
  Rated transient overvoltage: 1500 V (*)
  *: This is a reference safety standard value for measurement category I of CSA/UL 61010-1, and for measurement category O of IEC/EN 61010-2-300. This value is not necessarily a guarantee of instrument performance.

- EMC standards:
  Compliant with
  CE marking
  EN 61326-1 Class A, Table 2 (For use in industrial locations),
  EN 61326-2-3
  *: The instrument continues to operate at a measurement accuracy of within ±20% of the range during testing.
  EN 55011 Class A, Group 1
  EN 61000-3-2 Class A
  EN 61000-3-3
  EMC Regulatory Arrangement in Australia and New Zealand
  EN 55011 Class A, Group 1
  *: KC marking: Electromagnetic wave interference prevention standard, electromagnetic wave protection standard compliance

Power Supply Specifications and Isolation

- Power supply
  Rated voltage: 100 to 240 V AC (+10%/-15%), 50/60 Hz
  24 V AC/DC (+10%/-15%) (When the /DC option is specified)
- Power consumption:
  UT35A/RSP: 18 VA (For the /DC option. 24 V DC: 9 VA, 24 V AC: 14 VA)
  UT32A/RSP: 15 VA (For the /DC option. 24 V DC: 7 VA, 24 V AC: 11 VA)
- Storage: Nonvolatile memory
- Allowable power interruption time: 20 ms (at 100 V AC)
- Withstanding voltage
  2300 V AC for 1 minute between primary and secondary terminals (UL, CSA)
  3000 V AC for 1 minute between primary and secondary terminals (CE)
  1500 V AC for 1 minute between primary terminals
  500 V AC for 1 minute between secondary terminals
  (Primary terminals = Power (*) and relay output terminals, Secondary terminals = Analog I/O signal terminals, contact input terminals, communication terminals, and functional grounding terminals.)
  *: Power terminals for 24 V AC/DC models are the secondary terminals.
- Insulation resistance
  Between power supply terminals and a grounding terminal: 20 MΩ or more at 500 V DC
- Isolation specifications

The circuits divided by lines are insulated mutually.
Environmental Conditions

Normal operating conditions
• Ambient temperature: -10 to 50°C (side-by-side mounting: -10 to 40°C)
  If the CC-Link option is specified, 0 to 50 °C for UT35A/RSP; 0 to 40 °C for UT32A/RSP.
  (side-by-side mounting: 0 to 40 °C for UT35A and UT32A with CC-Link option)
• Ambient humidity: 20 to 90% RH (no condensation)
• Magnetic field: 400 A/m or less
• Continuous vibration (at 5 to 9 Hz) Half amplitude of 1.5 mm or less
  (at 9 to 150 Hz) 4.9 m/s² or less, 1 oct/min for 90 minutes each in the three axis directions
• Rapid vibration: 14.7 m/s², 15 s or less
• Impact: 98 m/s² or less, 11 msec.
• Installation altitude: 2,000 m or less above sea level
• Warm-up time: 30 minutes or more after the power is turned on
• Start-up time within 10 s

Transportation and Storage Conditions
• Temperature: -25 to 70°C
• Temperature change rate: 20°C per hour or less
• Humidity: 5 to 95%RH (no condensation)

Effects of Operating Conditions
• Effect of ambient temperature
  For voltage or TC input:
  ±1 μ V/°C or ±0.01% of F.S. (instrument range)/°C, whichever is greater
  For RTD input:
  ±0.05°C/°C (ambient temperature) or less
  For current input:
  ±0.01% of F.S. (instrument range)/°C
  For analog output:
  ±0.02% of F.S./°C or less
• Effect of power supply fluctuation:
  For analog input: ±0.05% of F.S. (instrument range) or less
  For analog output: ±0.05% of F.S. or less
  (Each within rated voltage range)

OUT retransmission output

* After the control output terminal is specified by the parameter OT, other current output terminals can be used as retransmission output.

* Equipped as standard.
Terminal Arrangement for UT35A/RSP Single Loop Control

Factory default: Control output is relay. Position proportional control. Terminal wiring differs in Heating/cooling control and Heating/cooling relay contact output.

- **Power supply**: 240 V AC, 3 A (resistance load)
- **Contact output**: 250 V AC, 3 A

Heating/cooling control output:
- **Heating-side control output**
- **Cooling-side control output**: (Suffix code: Type 1=-2)
  - Can be used for retransmission output or 15 V DC loop power supply when control output is used.
  - Control output range can be changed.

- **Retransmission output**
  - E1 is displayed in terminal when the parameter is undefined.
  - PV input type is undefined.
  - PV input range of 1-5 V DC, 0-2 V DC, 0-10 V DC
  - Default: 1-5 V DC

- **Remote input RSP**
  - +20 mA to -20 mA
  - 0-2 V DC, 0-10 V DC
  - Specify within a range of 1-5 V DC,
Terminal Arrangement for UT32A/RSP Single Loop Control

**Control output**
- OUT (Suffix code: Type 1=0)
- RSP (Suffix code: Type 1=2)
- Remote input
- VT
- RTD input

**PV input**
- To input
- Factory default: PV input type is selectable.

**Retransmission output**
- RET (Equipped as standard)

**Heating/cooling control output**
- OUT (Suffix code: Type 1~2)

**Contact output**
- ALM (Equipped as standard)
- Contact input / Contact output

**Power supply**
- 24 V AC/DC power supply (Option code: /RSP)
- RS-485 communication
- 24 V DC loop power supply (Suffix code: Type 1=1)

**Position proportional control output**
- VALV

**Remote input**
- Terminal Arrangement
- Displayed in terminal area when the parameter setting.
- Factory default: Control output is relay. Output and Heating/cooling control output below.
- Position proportional control.
- Terminal wiring differs in Heating/cooling control and Relay contact output.

**Relay contact output**
- NO
- Alarm-1 output
- Alarm-2 output

**Contact rating**
- 240 V AC, 3 A

**Cooling-side control output**
- OUT (Suffix code: Type 1~2)

**Control output**
- OUT (Suffix code: Type 1=0, -1 or -2)

**Contact input**
- DI (Equipped as standard)

**Heater break alarm**
- HBA (Option code: /HA)

**RS-485 communication**
- RS485

**24 V DC loop power supply**
- LPS24

**CC-Link communication (with Modbus master)**
- Type 3=3

**Contact input / Contact output**
- DO (Suffix code: Type 2=2)

Construction, Mounting, and Wiring

- Dust-proof and drip-proof: IP66 (Front panel) (Not applicable to side-by-side close mounting)/NEMA4 *
- Material: Polycarbonate resin (Flame retardancy: UL94 V-0)
- Case color: White (Light gray) or Black (Light charcoal gray)
- Weight: 0.5 kg or less
- External dimensions (mm):
  - UT35A: 96 (width) x 96 (height) x 65 (depth from the panel surface)
  - UT32A: 48 (width) x 96 (height) x 65 (depth from the panel surface)
- Mounting: Direct panel mounting; mounting bracket, one each for upper and lower mounting
- Panel cutout dimensions (mm):
  - UT35A: 92+0.8/0 (width) x 92+0.8/0 (height)
  - UT32A: 45+0.6/0 (width) x 92+0.8/0 (height)
- Mounting position: Up to 30 degrees above the horizontal. No downward tilting allowed.
- Wiring: M3 screw terminal with square washer (signal wiring and power)

*Hose-down test only
*N “N” stands for the number of controllers to be installed. However, the measured value applies if N≥5.
Normal tolerance: ±(value of JIS B 0401-1998 tolerance class IT18)/2
