Overview
The UT35A/MDL and UT32A/MDL controllers can be mounted in an enclosure. A ladder sequence function is included as standard. The short depth of the controller helps save space in an enclosure. The UT35A and UT32A also support open networks such as Ethernet communication.

The UT35A and UT32A have a Panel mounting type (without option code /MDL). For more details, please see General Specification GS 05P01D31-01EN.

Features
• Simple panel surface
