## Overview

The UT35A/MDL and UT32A/MDL controllers can be mounted in an enclosure. A ladder sequence function is included as standard. The short depth of the controller helps save space in an enclosure. The UT35A and UT32A also support open networks such as Ethernet communication.

The UT35A and UT32A have a Panel mounting type (without option code /MDL). For more details, please see General Specification GS 05P01D31-01EN.

## Features

- **Simple panel surface**
  Mounting the controller in an enclosure simplifies the panel surface.
- **Ladder sequence function** is included as standard. This function allows for creating a simple sequence control. Dedicated LL50A Parameter Setting Software (sold separately) allows for performing programming using a ladder language.
- **Various built-in open network functions** such as Ethernet are available. Easy connection with various vendors’ PLCs is possible. (UT32A support CC-Link and RS485 communication only.)
- **Quick setting function**
  Setting only the minimum necessary parameters for operation is possible.
- **Equipped with a multitude of functions**
  Universal I/O and retransmission output are included as standard. PID control, heating/cooling control, etc. are available.
- **LL50A Parameter Setting Software** (sold separately)
  The parameters and ladder programs of UTAdvanced controller can be built from a PC using this software. It makes data management even easier.

## Functional Specifications

### Control Specifications

#### (1) Control Mode

- **Single-loop control**

#### (2) Control period

- **200 ms**

### Table of Number of Inputs and Outputs

<table>
<thead>
<tr>
<th>Model and suffix code (See the model code)</th>
<th>Number of analog input points</th>
<th>Number of analog output points (*)</th>
<th>Number of contact input points</th>
<th>Number of contact output points (*)</th>
</tr>
</thead>
<tbody>

</table>

*1: Excluding control output

*2: The analog output point can be used as either cooling control output or transmission output.

*3: Excluding control output relays

### Control Computation Function

#### (1) Types of control

- PID control
- ON/OFF control
- Two-position two-level control (*)
- Heating and cooling control (*)

*4: Selectable for heating and cooling control

#### (2) Control Computation Function

- (a) Target setting point and the number of PID parameter groups
  Respectively, four sets of target setpoints, alarm setpoints, and PID parameters can be set.
- (b) Selecting the PID parameter group
  The following PID parameter groups can be selected.
  - Target setpoint number (SPNO) (The PID number can be set arbitrarily.)
  - Measured input zone PID
  - Target setpoint zone PID
  - Reached target setpoint zone PID
- (c) Auto-tuning
  - Tuning results can be selected from two options, Normal or Stable.
  - Tuning output limit can be set. (It cannot be used in heating/cooling control.)
- (d) “Super” function: Overshoot-suppressing function
- (e) “Super 2” function: Hunting-suppressing function
- (f) STOP preset output function
- (g) Input ERROR preset output function
- (h) MANUAL preset output function

### (3) Operation Mode Switching

<table>
<thead>
<tr>
<th>Operation mode switching</th>
<th>AUTO/MANUAL and RUN/STOP switching</th>
<th>REMOTE/LOCAL switching (only model with communication option)</th>
</tr>
</thead>
</table>
### (4) Control Parameter Setting Range

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Setting Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>Proportional band</td>
<td>0.1 to 999.9%</td>
</tr>
<tr>
<td>Integral time</td>
<td>1 to 6000 sec. or OFF (using manual reset)</td>
</tr>
<tr>
<td>Derivative time</td>
<td>1 to 6000 sec. or OFF</td>
</tr>
<tr>
<td>ON/OFF control hysteresis</td>
<td>0.0 to 100.0% of measured input range width</td>
</tr>
<tr>
<td>Preset output value</td>
<td>-5.0 to 105.0% (however, 0 mA or less cannot be output)</td>
</tr>
<tr>
<td>High/low output limiter</td>
<td>-5.0 to 105.0% Low limit setpoint &lt; high limit setpoint</td>
</tr>
<tr>
<td>Tight shut function</td>
<td>0.1 to 100.0%/sec., OFF</td>
</tr>
<tr>
<td>Output deadband</td>

</tr>
</tbody>
</table>

### Alarm Functions
- **Types of Alarm**
  - Measured value alarm
  - Deviation alarm
  - Rate-of-change alarm
  - Setpoint alarm
  - Output alarm
  - Other alarms
- **Alarm Functions**
  - Alarm output action
  - Alarm output settings
  - Alarm output points
- **Contact I/O Function**
  - Contact input
  - Contact output

### Ladder Sequence Function

#### (1) Number of I/O Points

<table>
<thead>
<tr>
<th>UT35A/MDL</th>
<th>UT32A/MDL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of digital input points</td>
<td>Up to 7</td>
</tr>
<tr>
<td>Number of digital output points</td>
<td>Up to 8</td>
</tr>
</tbody>
</table>

This is limited by the number of contact I/O signal points. (See the model code.)

#### (2) Types of Command

<table>
<thead>
<tr>
<th>Number of basic command types</th>
<th>Remark</th>
</tr>
</thead>
<tbody>
<tr>
<td>13</td>
<td>Load, AND, OR, Timer, Counter, etc.</td>
</tr>
<tr>
<td>73</td>
<td>Comparison, reverse, addition/subtraction/multiplication/division, logic operation, high/low limiter, etc.</td>
</tr>
</tbody>
</table>

#### (3) Sequence Device

<table>
<thead>
<tr>
<th>Digital I/O</th>
<th>Types of device</th>
<th>Number of points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Input relay</td>
<td>M relay (bit data)</td>
<td>256</td>
</tr>
<tr>
<td></td>
<td>DAT register (data)</td>
<td>28</td>
</tr>
<tr>
<td></td>
<td>P register (parameter)</td>
<td>10</td>
</tr>
<tr>
<td></td>
<td>K register (constant)</td>
<td>30</td>
</tr>
<tr>
<td>Internal device</td>
<td>Special relay (bit data)</td>
<td>12</td>
</tr>
<tr>
<td>Special device</td>
<td>Special relay (bit data)</td>
<td>12</td>
</tr>
</tbody>
</table>

Process data and process relay can be used besides the above-mentioned.

#### (4) Program capacity

Max Program capacity: 300 steps *

*: Available number of steps differs according to the parameters and using command.

#### (5) Ladder computation period

Ladder computation period is the same as control period.
### Communication Function

</tbody>
</table>

The accuracy is that in the standard operating conditions: 23 ±2°C, 55 ±10%RH, and power frequency at 50/60 Hz.

1: ±0.3°C and ±1 digit in the range between 0 and 100°C ±0.5°C ±1 digit in the range between -100 and 200°C
2: W-5% Re/W-26% Re (Hoskins Mfg. Co.), ASTM E988

- Applicable standards: JIS, IEC and DIN (ITS-90) for thermocouples and resistance-temperature detectors (RTD)
- Input sampling period: Synchronized to control period
• Burnout detection
  Upscale and downscale of function, and OFF can be specified for the standard signal of thermocouple and resistance-temperature detector (RTD).
  For integrated signal input, 0.1 V or 0.4 mA or less is judged as a burnout.
• Input bias current: 0.05 μA (for thermocouple and resistance-temperature detector (RTD))
• Resistance-temperature detector (RTD) measured current: About 0.16 mA
• Input resistance
  1 MΩ or more for thermocouple/mV input
  About 1 MΩ for voltage input
  About 250 Ω for current input (with built-in shunt resistance)
• Allowable signal source resistance
  250 Ω or less for thermocouple/mV input
  Effect of signal source resistance: 0.1 μV/Ω or less
  2 kΩ or less for DC voltage input
  Effect of signal source resistance: about 0.01%/100 Ω
• Allowable wiring resistance
  Up to 150 Ω per line for resistance-temperature detector (RTD) input (conductor resistance between the three lines shall be equal)
  Effect of wiring resistance: ±0.1°C/10 Ω
• Allowable input voltage/current
  ±10 V DC for thermocouple/mV/mA or resistance-temperature detector (RTD) input
  ±20 V DC for V input
  ±40 mA DC for mA input
• Noise reduction ratio
  40 dB or more (at 50/60 Hz) in normal mode
  120 dB or more (at 50/60 Hz) in common mode
• Reference junction compensation error
  ±1.0°C (15 to 35°C)
  ±1.5°C (-10 to 5°C and 35 to 50°C)

**Contact Input Specifications**

• Number of points: 2 points (standard)
  For the maximum number of points, see the model and suffix code table.
• Input type: no-voltage contact input or transistor contact input
• Input contact capacity: 12 V DC, 10 mA or more
  Be sure to use a contact with a minimum ON current of 1 mA or less
• ON/OFF detection
  For no-voltage contact input:
  - Contact resistance 1 kΩ or less in ON state
  - Contact resistance 50 kΩ or more in OFF state
  Transistor contact input:
  - 2 V or less in ON state
  - Leak current 100 μA or less in OFF state
• Status detection minimum hold time: control period + 50 ms
• Application: SP switching, operation mode switching, event input

**Analog Output Specifications**

• Number of points
  - Control output (heating-side output): 1 point (standard), which is shared with transmission output
  - Cooling-side output: 1 point, which is shared with transmission output
• Output functions
  - Current output or voltage pulse output
  - Current output: 4 to 20 mA DC or 0 to 20 mA DC/load
  - Current output accuracy
    ±0.1% of span (however, ±5% of span for 1 mA or less)
  - The accuracy is that in the standard operating conditions: 23 ±2°C, 55 ±10%RH, and power frequency at 50/60 Hz
• Voltage pulse output
  Application: time proportional output
  - ON voltage: 12 V or more/load resistance of 600 Ω or more
  - OFF voltage: 0.1 V DC or less
  - Time resolution: 10 ms or 0.1% of output value, whichever is larger

**Retransmission Output Specifications**

• Number of points: 1 point (standard), which is shared with 15 V DC loop power supply
  Additional 1 points when analog control output are not used
• Output function: current output
  - 4 to 20 mA DC or 0 to 20 mA DC/load
  - resistance 600 Ω or less
• Current output accuracy (conversion accuracy from PV value on the set scale): ±0.1% of span (however, ±5% of span for 1 mA or less)
  The accuracy is that in the basic operating conditions: 23 ±2°C, 55 ±10%RH, and power frequency at 50/60 Hz
  This is not conversion accuracy through input and output but the performance of transmission output itself.

**15V DC Loop Power Supply Specifications**

• Number of points: 1 point (standard), which is shared with retransmission output
  Control output (1 point) can also be used.
• Supply voltage: 14.5 to 18.0 V DC
• Maximum supply current: about 21 mA (with short-circuit current limiting circuit)

**Step Response Time Specifications**

Within 1 s
(Response time at 63% of transmission output when a change is made stepwise in the range between 10 and 90% of input span)

**Relay Contact Output Specifications**

• Types of contact and number of points
  - Control relay output: one 1c-contact point
  - Control output of heating and cooling control: 2, 1a-contact points
  - Alarm output: 3 1a-contact points (Common is separated)
• Contact rating
  1c-contact: 3 A at 250 V AC or 3 A at 30 V DC (resistance load)
  1a-contact:
  - For alarm output: 1 A at 240 V AC or 1 A at 30 V DC (resistance load)
  - For output of heating and cooling control relay output: 3 A at 240 V AC or 3 A at 30 V DC (resistance load)
  - The control output should always be used with a load of 10 mA or more.
  The alarm output should always be used with a load of 1 mA or more.
• Application: time proportional output, alarm output, FAIL output, etc.
• Time resolution for control output: 10 ms or 0.1% of output value, whichever is larger

Transistor Contact Output Specifications
• Number of points: see the model and suffix code table
• Output form: open collector (sink current)
• Output contact capacity: Up to 24 V DC, 50 mA
• Output time resolution: min 200 ms
• Application: alarm output, FAIL output, etc.

Heater Break Alarm Specifications (for /HA Option)
• Function: Measures the heater current using an external current transformer (CT) and generates a heater break alarm when the measured value is less than the disconnection detection value.
• Number of input points: 2 points
• Number of output points: 2 points (transistor contract output)
• CT input resistance: about 9.4 Ω
• CT input range: 0.0 to 0.1 Arms (0.12 Arms or more cannot be applied)
• Heater current alarm setting range: OFF, 0.1 to 300.0 Arms
  Heater current measured value display range: 0.0 to 360.0 Arms
  *: The CT ratio can be set. CT ratio setting range: 1 to 3300
• Recommended CT: CT from URD Co. Ltd.
  CTL-6-S-H: CT ratio 800, measurable current range: 0.1 to 80.0 Arms
  CTL-12L-30: CT ratio 3000, measurable current range: 0.1 to 180.0 Arms
• Heater current measurement period: 200 ms
• Heater current measurement accuracy: ±5% of CT input range span ±1 digit (CT error is not included)
• Heater current detection resolution: Within 1/250 of CT input range span
• Disconnection detection ON time: Minimum 200 ms. (for time proportional output)

24 V DC Loop Power Supply Specifications (for /LP Option)
• Application: Power is supplied to the 2-wire transmitter.
• Supply voltage: 21.6 to 28.0 V DC
• Rated current: 4 to 20 mA DC
• Maximum supply current: About 30 mA (with short-circuit current limiting circuit)

Maintain Port Specifications
The maintenance port is used to connect a dedicated cable when using the LL50A Parameter Setting Software (sold separately). Through this port, you can set controller parameters, download ladder programs, and so on. For details, see the LL50A General Specifications (GS05P05A01-01EN).

Safety and EMC Standards
• Safety:
  Compliant with IEC/EN 61010-1 (CE), IEC/EN 61010-2-201 (CE), IEC/EN 61010-2-030 (CE), approved by CAN/CSA C22.2 No. 61010-1 (CSA), approved by UL 61010-1.
  Installation category: II
  Pollution degree: 2
  Measurement category: I (CAT I) (UL, CSA)
  O (Other) (CE)
  Rated measurement input voltage: Max. 10 V DC
  Rated transient overvoltage: 1500 V (*)
  *: This is a reference safety standard value for measurement category I of CSA/UL 61010-1, and for measurement category O of IEC/EN 61010-2-030. This value is not necessarily a guarantee of instrument performance.

• EMC standards:
  Compliant with
  CE marking
  EN 61326-1 Class A, Table 2 (For use in industrial locations).
  EN 61326-2-3
  *: The instrument continues to operate at a measurement accuracy of within ±20% of the range during testing.
  EN 55011 Class A, Group 1
  EN 61000-3-2 Class A
  EN 61000-3-3
  EMC Regulatory Arrangement in Australia and New Zealand
  EN 55011 Class A, Group 1
  • KC marking: Electromagnetic wave interference prevention standard, electromagnetic wave protection standard compliance
## Power Supply Specifications and Isolation

- **Power supply**
  - Rated voltage: 100 to 240 V AC (+10%/-15%), 50/60 Hz
  - 24 V AC/DC (+10%/-15%) (When the /DC option is specified)
- **Power consumption**:
  - UT35A/MDL: 18 VA (For the /DC option. DC: 9 VA, AC: 14 VA)
  - UT32A/MDL: 15 VA (For the /DC option. DC: 7 VA, AC: 11 VA)
- **Storage**: Nonvolatile memory
- **Allowable power interruption time**: 20 ms (at 100 V AC)
- **Withstanding voltage**:
  - 2300 V AC for 1 minute between primary and secondary terminals (UL, CSA)
  - 3000 V AC for 1 minute between primary and secondary terminals (CE)
  - 1500 V AC for 1 minute between primary terminals
  - 500 V AC for 1 minute between secondary terminals
  (Primary terminals = Power (*) and relay output terminals, Secondary terminals = Analog I/O signal terminals, contact input terminals, communication terminals, and functional grounding terminals.)
- **Insulation resistance**
  - Between power supply terminals and a grounding terminal: 20 MΩ or more at 500 V DC
- **Isolation specifications**

The circuits divided by lines are insulated mutually.

## Transportation and Storage Conditions

- **Temperature**: -25 to 70°C
- **Temperature change rate**: 20°C per hour or less
- **Humidity**: 5 to 95%RH (no condensation)

## Effects of Operating Conditions

- **Effect of ambient temperature**
  - For voltage or TC input: ±1 μ V/°C or ±0.01% of F.S. (instrument range)/°C, whichever is greater
  - For RTD input: ±0.05°C/°C (ambient temperature) or less
  - For current input: ±0.01% of F.S. (instrument range)/°C
  - For analog output: ±0.02% of F.S./°C or less
- **Effect of power supply fluctuation**: 
  - For analog input: ±0.05% of F.S. (instrument range) or less
  - For analog output: ±0.05% of F.S. or less

  (Each within rated voltage range)

## Environmental Conditions

- **Normal operating conditions**
  - Ambient temperature: -10 to 50°C
  - If the CC-Link option is specified, 0 to 50 °C for UT35A/MDL; 0 to 40 °C for UT32A/MDL.
  - (side-by-side mounting: 0 to 50 °C for UT55A/MDL; 0 to 40 °C for UT52A/MDL)
  - Ambient humidity: 20 to 90% RH (no condensation)
  - Magnetic field: 400 A/m or less
  - Continuous vibration (at 5 to 9 Hz) Half amplitude of 1.5 mm or less
  - (at 9 to 150 Hz) 4.9 m/s² or less, 1 oct/min for 90 minutes each in the three axis directions
  - Rapid vibration: 14.7 m/s², 15 s or less
  - Impact: 98 m/s² or less, 11 msec.
  - Installation altitude: 2,000 m or less above sea level
  - Warm-up time: 30 minutes or more after the power is turned on
  - Start-up time within 10 s
## Block Diagram

### Single Loop Control

- **Input ladder calculation program** (signal goes to the control computation as is when without ladder program). For ladder program, see the LL50A Parameters Setting Software User’s Manual.

- **Output ladder calculation program** (signal goes to the output as is when without ladder program). For ladder program, see the LL50A Parameters Setting Software User’s Manual.

## Terminal Arrangement

### Terminal Arrangement for UT35A/MDL Single Loop Control

#### Control output

- **OUT**
  - Suffix code: Type 1=-5
  - Factory default: Control output is relay

#### Heating/cooling control output

- **OUT2**
  - Suffix code: Type 1=2
  - Only used for heating/cooling control output

#### Contact output

- **ALM**
  - Equipped as standard
  - Contact rating: 12 V DC, 10 mA or more

#### Power supply

- **15 V DC loop power supply**
  - 14.5-18.0 V DC (Max. 21 mA DC)
  - Can be used for retransmission output or 15 V DC loop power supply when current/voltage pulse output is not used for control output.
  - Current output range can be changed.

#### Retransmission output

- **RET**
  - Equipped as standard
  - Can be used for retransmission output or 15 V DC loop power supply when current/voltage pulse output is not used for control output.
  - Current output range can be changed.

#### Costing-side control output

- **OUT2**
  - Suffix code: Type 1=2
  - Only used for costing-side control output

#### Control output

- **OUT**
  - Suffix code: Type 1=0 or -2
  - Factory default: PV input type is undefined.

#### DI (Equipped as standard)

- **DI**
  - Contact input
  - Contact rating: 12 V DC, 10 mA or more

#### PV input

- **PV**
  - Voltage (mV, V) input
  - Current (mA) input
  - (Suffix code: Type 1=-2)

#### RET/OUT2

- **Current/voltage pulse output**
  - 0-20 mA DC, 4-20 mA DC, Voltage pulse (12 V)
  - Factory default: PV retransmission

- **Common**
  - 50/60 Hz shared

- **Heating/cooling control output**
  - Heating/side
  - Cooling/side
  - Contact rating: 240 V AC, 3 A
  - 30 V DC, 3 A (resistance load)

- **Heating/cooling relay contact output**
  - NO
  - CO

- **Common**
  - 50/60 Hz shared

- **DI**
  - Equipped as standard
  - Contact input
  - Contact rating: 12 V DC, 10 mA or more

- **DI2**
  - DI1
  - COM
  - AUTO when DI1=ON
  - MAN when DI1=OFF
  - STOP when DI2=ON
  - RUN when DI2=OFF

- **Common**
  - 50/60 Hz shared

- **No-voltage contact**
  - Transistor contact

- **UT**
  - 104
  - 105
  - 106
  - 107
  - 108
  - 109
  - 110
  - 111

- **Common**
  - 100-240 V AC power supply

Function can be assigned to the terminals with no function.
**External Dimensions**

**Construction, Mounting, and Wiring**

- **Construction:** DIN rail mounting type
- **Material:** Polycarbonate resin (Flame retardancy: UL94 V-0)
- **DIN rail mounting bracket material:** Panel steel sheet
- **Case color:** Black (Light Charcoal gray)
- **Weight:** 1 kg or less
- **External dimensions (mm):**
  - UT55A/MDL: 96 (width) x 114 (height) x 100 (depth)
  - UT52A/MDL: 48.2 (width) x 114 (height) x 100 (depth)
- **Compatible DIN rails:** TH35-7.5Fe, TH35-7.5At, JIS C 2812
- **Mounting position:** Horizontal.
- **Wiring:** M3 screw terminal with square washer (signal wiring and power)

</tbody>
</table>

*1: When /LP option is specified, the RS-485 communication of the type 2 code “1” is 2-wire system.

*2: The /MDL option is specified, the model and suffix codes are follows:
- UT32A-010-11-00/x/MDL
- UT32A-003-11-00/x/MDL
- UT32A-210-11-00/x/MDL

*3: When /MDL option and /LP option is combined, “3” cannot be specified for Type 3 code.

*4: The /HA option can be specified only in the combination of Type2 code “1” and Type 3 code “0.”

*5: When the /CT option is specified, the UT32A does not conform to the safety standards (UL and CSA) and CE marking (Products with /CT option are not intended for EEA-market).
