Multiple sensor measurements offer additional functionalities; calculated data function that can be customized.

The FLXA402 converter includes a color Human Machine Interface (HMI), that offers easy touch screen operation and simple instinctive menu structure in 11 languages. Start up and commission time is minimal. Menus of display, execution and setting are displayed in a selected language. The FLXA402 offers a variety of communications, mA/HART, Modbus TCP, Modbus RTU/RS485. And FieldMate working on tablet PC can be used as a local display via Bluetooth or RS485.

**Notes:**

*1. Urethane coating is for acid resistance. For high anti-corrosion coating, urethane coating and epoxy coating which is for alkali resistance are applied.

*2. On 1st input, with a connection to BA11 Junction Box, up to 4 sensors equipped with SA11 can be connected except when type “-DD” (NI for FM) is selected. When Type “-DD” (NI for FM) is selected, only 1 sensor equipped with SA11 can be connected. BA11 cannot be used.

*3. On 2nd input, only 1 sensor equipped with SA11 can be connected.

*4. Select only “-J” if you use the converter in Japan. Only SI unit (International System of Units) applies.

*5. Universal mounting kit contains pipe, wall mounting hardware (/U) and panel mounting hardware (/PM).

*6. Available only when “-E” (Modbus TCP/IP) via digital communication is selected.

*7. There are 8 cable entry holes. Check the table below. If you need, purchase the adapters additionally to comply with requirements in the specification.

*8. When selecting Type “-DD” (Nonincendive for FM), “-D1” “-D5” on 1st/2nd input are not available.

*9. When you select both 1st and 2nd inputs, prepare a sensor for each input. If you do not connect the sensor, an alarm will occur.
