Revision Information
1. Introduction

This manual provides the basic guidelines for explosion protection type of ADMAG TI (Total Insight) Series AXG magnetic flowmeters. For the items which are not covered in this manual, read the applicable user’s manuals and general specifications as listed in IM 01E21A21-01Z1 (Read Me First). These documents can be downloaded from the website of YOKOGAWA. To ensure correct use of the product, read these manuals thoroughly and fully understand how to operate the product before maintaining it. For method of checking the model and specifications, read the applicable general specifications in IM 01E21A21-01Z1 (Read Me First).

Website address: http://www.yokogawa.com/fld/doc/
These manuals can be downloaded from the website of YOKOGAWA or purchased from the YOKOGAWA representatives.

NOTE

When describing the model name like “AXG###” in this manual, “###” means any of the following.
For AXG###:
- 002, 005, 010, 015, 025, 032, 040, 050, 065, 080, 100, 125, 150, 200, 250, 300, 350, 400

Precautions Related to the Protection, Safety, and Alteration of the Product

The following safety symbol marks are used in this manual and product.

IMPORTANT

An IMPORTANT sign denotes that attention is required to avoid damage to the product or system failure.

NOTE

A NOTE sign denotes information necessary for essential understanding of operation and features.

The following symbols are used in the product and the manual to indicate the accompanying safety precautions:

- Protective grounding terminal
- Functional grounding terminal (This terminal should not be used as a protective grounding terminal.)
- Alternating current
- Direct current
- Caution

This symbol indicates that the operator must refer to an explanation in the user’s manual in order to avoid the risk of injury or death of personnel or damage to the product.

- For the protection and safe use of the product and the system in which this product is incorporated, be sure to follow the instructions and precautions on safety that is stated in user’s manual as listed in IM 01E21A21-01Z1 (Read Me First) whenever you handle the product. Take special note that if you handle the product in a manner that violated these instructions, the protection functionality of the product may be damaged or impaired. In such cases, YOKOGAWA does not guarantee the quality, performance, function, and safety of product.
- Do not modify this product.
- The product should be disposed of in accordance with local and national legislation/ regulations.
<1. Introduction>

**Regarding This User’s Manual**
- This manual should be provided to the end user.
- The contents of this manual are subject to change without prior notice.
- All rights reserved. No part of this manual may be reproduced in any form without YOKOGAWA’s written permission.
- YOKOGAWA makes no warranty of any kind with regard to this manual, including, but not limited to, implied warranty of merchantability and fitness for a particular purpose.
- If any question arises or errors are found, or if any information is missing from this manual, inform the nearest YOKOGAWA sales office.
- The specifications covered by this manual are limited to those for the standard type under the specified model number break-down and do not cover custom-made products.
- Note that changes in the specifications, construction, or component parts of the product may not immediately be reflected in this manual at the time of change, provided that postponement of revisions will not cause difficulty to the user from a functional or performance standpoint.
- This manual is intended for the following personnel:
  Engineers responsible for installation and wiring of the instrument.
- To ensure correct use, read this manual and the applicable user’s manuals as listed in IM 01E21A21-01Z1 (Read Me First) thoroughly before starting operation. Read the general specifications as listed in IM 01E21A21-01Z1 (Read Me First) for its specification.

**Trademark**
- All the brands or names of Yokogawa Electric’s products used in this manual are either trademarks or registered trademarks of Yokogawa Electric Corporation.
- All other company and product names mentioned in this manual are trade names, trademarks or registered trademarks of their respective companies.
- In this manual, trademarks or registered trademarks are not marked with ™ or ®.

**For Safe Use of Product**
For the protection and safe use of the product and the system in which this product is incorporated, be sure to follow the instructions and precautions on safety that is stated in user's manual as listed in IM 01E21A21-01Z1 (Read Me First) whenever you handle the product. Take special note that if you handle the product in a manner that violated these instructions, the protection functionality of the product may be damaged or impaired. In such cases, YOKOGAWA shall not be liable for any indirect or consequential loss incurred by either using or not being able to use the product.
2. Explosion Protection Type

⚠ WARNING
AXG### magnetic flowmeter (Integral Flowmeter or Remote Sensor), and AXG4A Remote Transmitter are products which have been certified as explosion protection type products. Strict limitations are applied to the structures, installation locations, external wiring work, maintenance and repairs, etc. of these products. Sufficient care must be taken, as any violation of the limitations may cause dangerous situations. Be sure to read this manual before handling the explosion protection type products.

⚠ WARNING
The terminal box cover and display cover are locked by special screw. In the case of opening the cover, use the hexagonal wrench (nominal size 3).
The covers of explosion protection type products are locked. Use this hexagonal wrench to open and close the cover. Before opening the cover, be sure to check that the power of flowmeter has been turned off. Once the cover is closed, be sure to re-lock the product.
Be sure to lock the cover with the special screw using the hexagonal wrench after tightening the cover.

2.1 Technical Data

Applicable Standard:

Certificate:
FM 17US0140X

Integral Flowmeter
Explosionproof (Explosion Protection Code: FF2)
- Type of Protection:
  - CL I/II/III GP ABCDEFG
  - IS CL I GP ABCD
  - T6...T3
- Enclosure: Type 4X
- Ambient Temperature:
  - See Table 2.1 and Table 2.2.
- Process Temperature:
  - See Table 2.1 and Table 2.2.
- Power Supply:
  - 100 to 240 Va.c. (50/60 Hz) / 100 to 120 Vd.c.
  - 24 Va.c. (50/60 Hz) / 24 Vd.c.
  - Um: 250 V
  - Current I/O: 4 to 20 mA, 32 Vd.c. max.
  - Digital I/O: 30 Vd.c. max., 200 mA max.
  - Fieldbus I/O: 32 Vd.c. max., 15 mA max.
  - Maximum Working Pressure:
    - Read “Fluid Temperature and Pressure”

Explosionproof with Output IS Circuit
(Explosion Protection Code: FJ2 and FT2)
- Type of Protection:
  - CL I/II/III GP ABCDEFG
  - IS CL I GP ABCD
  - AIS CL I/II/III GP ABCDEFG
  - T6...T3
- Enclosure: Type 4X
- Ambient Temperature:
  - See Table 2.1 and Table 2.2.
- Process Temperature:
  - See Table 2.1 and Table 2.2.
- Power Supply:
  - 100 to 240 Va.c. (50/60 Hz) / 100 to 120 Vd.c.
  - 24 Va.c. (50/60 Hz) / 24 Vd.c.
  - Um: 250 V
  - Control Drawing: DIE016-A92
  - Maximum Working Pressure:
    - Read “Fluid Temperature and Pressure”
Remote Sensor
Explosionproof
(Explosion Protection Code: FF2)
- Type of Protection:
  CL I/II/III GP ABCDEFG
  IS CL I GP ABCD
  T6...T3
- Enclosure: Type 4X
- Ambient Temperature:
  See Table 2.1 and Table 2.2.
- Process Temperature:
  See Table 2.1 and Table 2.2.
- Um: 250 V
- Maximum Working Pressure:
  Read “Fluid Temperature and Pressure”

Remote Transmitter
Explosionproof
(Explosion Protection Code: FF2)
- Type of Protection:
  CL I/II/III GP ABCDEFG
- Enclosure: Type 4X
- Ambient Temperature: −40°C to +60°C
- Temperature class: T6
- Power Supply:
  100 to 240 V a.c. (50/60 Hz) / 100 to 120 V d.c.
  24 V a.c. (50/60 Hz) / 24 V d.c.
- Current I/O: 4 to 20 mA, 32 V d.c. max.
- Digital I/O: 30 V d.c. max., 200 mA max.
- Fieldbus I/O: 32 V d.c. max., 15 m a max.

Explosionproof with Output IS Circuit
(Explosion Protection Code: FJ2 and FT2)
- Type of Protection
  CL I/II/III GP ABCDEFG
  AIS CL I/II/III GP ABCDEFG
- Enclosure: Type 4X
- Ambient Temperature: −40°C to +60°C
- Temperature class: T6
- Power Supply:
  100 to 240 V a.c. (50/60 Hz) / 100 to 120 V d.c.
  24 V a.c. (50/60 Hz) / 24 V d.c.
- Control Drawing: DIE016-A92

2.3 Installation
- All wiring shall comply with NFPA70 (US) and local electric codes and requirements.
- Unused apertures shall be closed with suitable certified blanking elements. (The plug attached is certified.)
- The sensor is not surrounded by pipe insulation material.
- In hazardous location, wiring shall be in conduit as follows. “SEAL ALL CONDUITS WITHIN 18 INCHES”
- In order to prevent the grounding conductor from loosening, the conductor must be secured to the terminal, tightening the screw with appropriate torque. Care must be taken not to twist the conductor.
- Warning: In cases where the ambient temperature exceeds 50°C, use external heat resistant wiring with a maximum allowable temperature of 70°C or above.
- For IS Output type, refer to DIE016-A92 (Control Drawing)
Read the Control Drawing.
All wiring shall comply with local installation requirements.

- **Integral Type Flowmeter (Explosion Protection Code: FJ2)**

Notes:

1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the National Electrical Code (NFPA 70), ANSI/ISA-RP12.06.01, and relevant local codes.
3. AXG/AXW Series Flowmeter must be grounded to an intrinsic safety ground system in accordance with NFPA 70 and ANSI/ISA-RP12.06.01.
4. Each associated apparatus must be an FM-approved linear source with the following parameters:
   - $U_o \leq U_i$
   - $I_o \leq I_i$
   - $P_o \leq P_i$
   - $C_o \geq C_i + C_{cable}$
   - $L_o \geq L_i + L_{cable}$
5. Power Supply and control equipment connected to AXG/AXW Series Flowmeter or Associated Apparatus must not use or generate more than $U_n$ of the connected equipment.
6. The control drawing of Associated Apparatus must be followed when installing the equipment.
7. Dust-tight conduit seals must be used when installed in Class II or Class III environments.
8. In selecting I/O code: “JT” or “DT”, Iout2 and P/Sout2 cannot be used.
10. WARNING – POTENTIAL ELECTROSTATIC CHARGING HAZARD

**Notes:**

1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the National Electrical Code (NFPA 70), ANSI/ISA-RP12.06.01, and relevant local codes.
3. AXG/AXW Series Flowmeter must be grounded to an intrinsic safety ground system in accordance with NFPA 70 and ANSI/ISA-RP12.06.01.
4. FISCO installation must be in accordance with ANSI/ISA 60079-25.
5. The associated apparatus must be an FM-approved FISCO power supply or linear source.
6. The associated apparatus must be an FM-approved linear source.
7. The following parameters must be satisfied for each circuit.
   - U_{0} (V_{oc}) ≤ U_{i}
   - I_{0} (I_{sc}) ≤ I_{i}
   - P_{0} ≤ P_{i}
   - C_{0} (C_{a}) ≥ C_{i} + C_{cable}
   - L_{0} (L_{a}) ≥ L_{i} + Leable
8. Power Supply and control equipment connected to AXG/AXW Series Flowmeter or Associated Apparatus must not use or generate more than U_{m} of the connected equipment.
9. The control drawing of Associated Apparatus must be followed when installing the equipment.
10. Dust-tight conduit seals must be used when installed in Class II or Class III environments.
11. **WARNING – POTENTIAL ELECTROSTATIC CHARGING HAZARD**
<2. Explosion Protection Type>

- Remote Type Flowmeter (Explosion Protection Code: FT2)

### Notes:
1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the National Electrical Code (NFPA 70), ANSI/ISA-RP12.06.01, and relevant local codes.
3. AXG/AXW Series Remote Sensor and Transmitter must be grounded to an intrinsic safety ground system in accordance with NFPA 70 and ANSI/ISA-RP12.06.01.
4. FISCO installation must be in accordance with ANSI/ISA 60079-25.
5. The associated apparatus must be an FM-approved FISCO power supply or linear source.
6. The associated apparatus must be an FM-approved linear source.
7. The following parameters must be satisfied for each circuit:
   - \( U_0 (U_{oc}) \leq U_i \)
   - \( I_0 (I_{so}) \leq I_i \)
   - \( P_0 \leq P_i \)
   - \( C_0 (C_{o}) \geq C_i + C_{able} \)
   - \( L_0 (L_{o}) \geq L_i + L_{able} \)
8. Power Supply and control equipment connected to AXG/AXW Series Remote Transmitter or Associated Apparatus must not use or generate more than \( U_m \) of the connected equipment.
9. The control drawing of Associated Apparatus must be followed when installing the equipment.
10. Dust-tight conduit seals must be used when installed in Class II or Class III environments.
11. **WARNING – POTENTIAL ELECTROSTATIC CHARGING HAZARD**
2.4 Operation

- Take care not to generate mechanical spark when access to the product and peripheral devices in hazardous locations.
- Take care the following warning marking when the opening the cover.

**Integral Flowmeter and Remote Transmitter**
- Take care the following warning marking "AFTER DE-ENERGIZING, DELAY 20 MINUTES BEFORE OPENING".

**Remote Sensor**
- Take care the following warning marking "OPEN CIRCUIT BEFORE REMOVING COVER".

2.5 Maintenance and Repair

Only personnel authorized by Yokogawa Electric Corporation can repair the equipment.

2.6 Specific Condition of Use

- In the case the electrodes and/or grounding rings are made of titanium, the sensor should be kept away from impacts and frictions in hazardous locations.
- Electrostatic charges on the non-metallic parts (excluding glass parts) or coated parts of the product shall be avoided.
- The applicable temperature class, ambient temperature range and process temperature range of the product are shown in Table 2.1 and Table 2.2.
- From the safety point of view the intrinsically safe circuit of product shall be assumed to be connected to ground.
- The product shall be installed as over-voltage category II.
- Remote sensor, for connection to a Remote Transmitter authorized by Yokogawa Electric Corporation.
Revision Information

- **Title**: ADMAG TI Series
  AXG Magnetic Flowmeter FM (USA) Explosion Protection Type
- **Manual No.**: IM 01E21A03-01EN
