External Dimensions

If not specified, the tolerance is ±3%. However, in cases of less than 10 mm, the tolerance is ±0.3 mm.
Attachment to a DIN Rail

As shown in the figure below, you can rack-mount or panel-mount the MX100/MW100 Data Acquisition Unit by attaching a DIN rail mount bracket to the base plate.

- Attachment of the DIN rail mount bracket to the base plate
  Bracket (brackets for the MX100 and MW100 have different shapes)

- Attachment of the base plate to the DIN rail
  Latch lever (pull up to remove the base plate from the DIN rail)
  DIN rail mount bracket

* To prevent slacks in the DIN rail, fix at least three locations of the DIN rail.

CAUTION

- When mounting the MX100 data acquisition unit main module (conventional model) to the base plate, remove the two base plate screws, then remove the bracket, then mount the main module (conventional model) on the base plate.

- When mounting the MW100 data acquisition unit main module to the base plate, replace the base plate bracket with the bracket that came with the MW100 data acquisition unit prior to mounting to the base plate.

Remove the base block bracket
Attach the bracket that came with the MW100
Dimensions when mounted on DIN rails (MX100)

Dimensions when mounted on DIN rails (MW100)

Note
The 30-CH Medium Speed DCV/TC/DI Input Module takes up three modules worth of space when attaching to the base plate. If attached incorrectly, damage or malfunction can result.

Wiring Procedure, Specifications, and Other Items Related to the Input/Output Modules
See the MX100/MW100 Data Acquisition Unit Installation and Connection Guide (IM MX100-72E) provided with the main module, or the MX100 Data Acquisition Unit User’s Manual (IM MX100-01E) or the MW100 Data Acquisition Unit User’s Manual (IM MW100-01E) contained in the manual CD-ROM.
