

## Japanese Shochu Plants

**Industry:** Food and Beverage  
**Product:** YFGW710  
YTA510  
EJX B Series  
YFGW510

### Application

- Temperature monitoring at a tank farm
- Temperature and pressure monitoring in tank jungles, three vertical monitoring points.

### Challenges

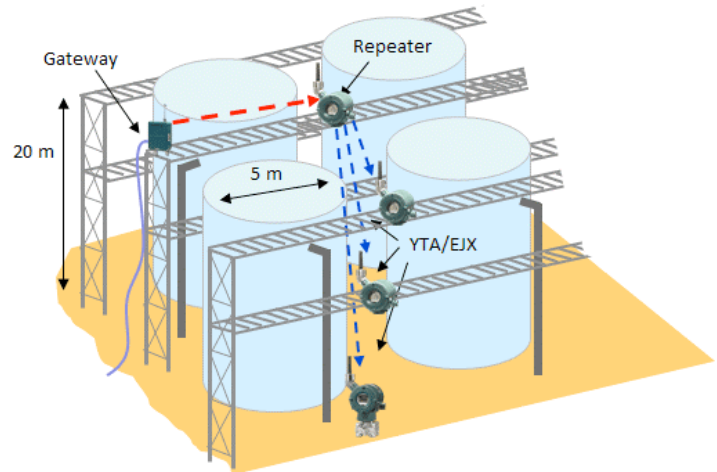

- Difficulty in cabling due to a large number of tanks.
- Congested tank jungle.
- Plan to add 12 tanks, thus future installation of a large number of new transmitters.

### Solutions

- ISA100 wireless temperature and pressure transmitters

### Benefits

- No cabling required
- ISA100 radio robustness in congested tank jungle.
- Scalability of transmitters with no cabling required in the future.

*Shochu is a popular Japanese liquor*
