YOKOGAWA ◆

Overview

- This tech note describes how to reassign the digital outputs of the UP55A/35A as time events.

- By default, the first (2) digital outputs are assigned as process variable events which are based on process conditions.
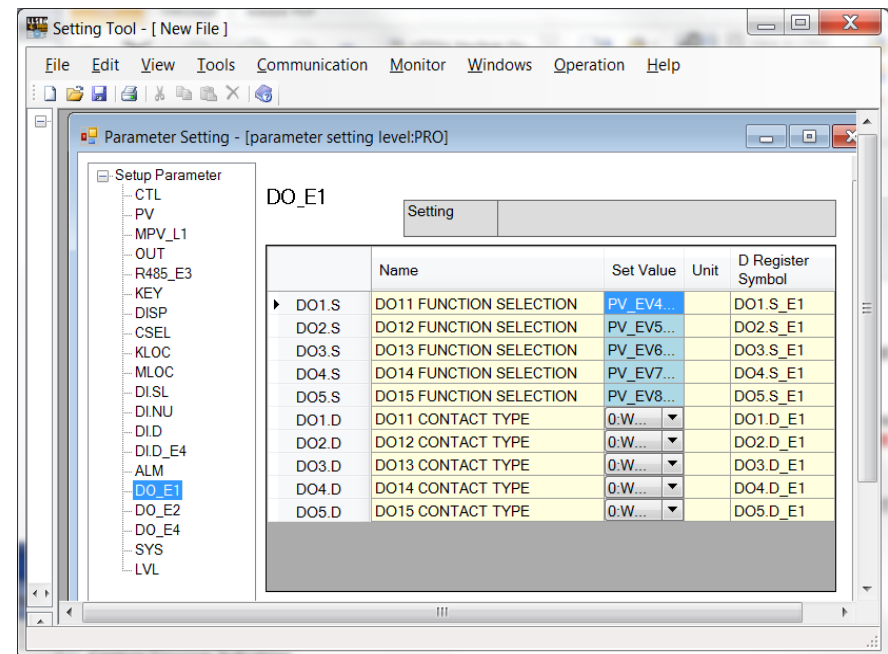

UP55A/35A DO Reassignment

- Using the LL50A software, go into the Setup parameters.
- Click on the ALM sub-menu. (AL1.S – AL3.S represent DO1 – DO3)
- Next, click on the Set Value for the DO to be changed.
- Now type TIME and you will see the drop-down box appear for the different Time events.
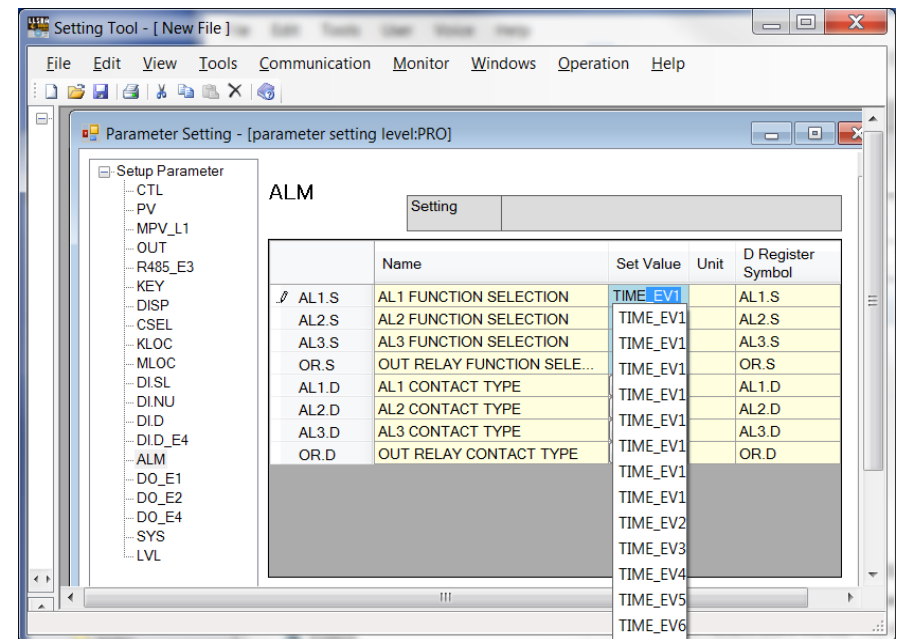

UP55A/35A DO Reassignment

⋯⋮ Choose the desired event

⋯⋮ Remaining DO's are set in the DO_E1 (DO11-15), DO_E2 (DO21-25) and DO_E4 (DO41&42) sub-menus. They are configured the same way.

⋯⋮ Save the configuration and download the file to the controller.

Thank you!
