

The background of the entire page is a teal-colored world map. Overlaid on the map are several large, semi-transparent blue arrows pointing from left to right. In the center, the title 'Oil & Gas Wellhead & Separation Product Line-up' is written in a white, bold, sans-serif font. Below the title, various Yokogawa industrial products are displayed, including a rack-mounted PLC, several digital pressure transmitters and transmitters with hand wheels, and a differential pressure transmitter. These products are arranged in a way that suggests they are part of a larger system. In the bottom left corner, there is a stylized image of an oil wellhead and a separation vessel, also in a teal color that matches the background. The overall design is clean and professional, emphasizing the company's focus on industrial automation and instrumentation.

YOKOGAWA 

Wellhead and Separation Product Line-up

Yokogawa's industrial automation and controls platforms are well regarded in the global marketplace as a leading control company and pioneer in the development of technologies for monitoring and control of processes in oil & gas.

The Wellhead and Beyond

Yokogawa's total solutions include not only the well site, but also the injection, pipeline, compressor station, and the process plant facility. Our experience for these applications can be integrated to optimize the overall operation capability and maintainability.

Increase Production and Reduce Costs Safely

Operation Center

- Asset Management & Control
- Process Historian
- Diagnostics
- Asset Performance
- Callout System

Compressor Station

- Asset Management & Control
- Remote Terminal Unit
- Multivariable Transmitters
- Communicator Device/Platform

Well Site

- Remote Terminal Units
- Transmitters
- Flow Meters
- Enclosures
- Wireless Devices
- Solar Panels

Pipeline

- Remote Terminal Units
- Transmitters
- Cabinets
- Solar Panels

Process Plant

- Distributed Control System
- Process Safety Systems
- Process Historian
- Controllers
- Flow Meters
- Transmitters
- Analyzers

Yokogawa is selected by major energy companies as their automation partner due to its focus on delivering highly reliable solutions – from instrumentation to RTUs, SCADA, DCS, safety systems and integrated digital oil & gas field applications. Providing a turnkey automation solution, Yokogawa offers a wide variety of sensors and controllers that are used to monitor and operate the digital oil & gas field, as well as engineering and configuration services and support. Explore the various products and solutions to increase the efficiency and environmental performance of your wells and ensure their safe and stable operation.
